TABLE OF CONTENTS

PART I: INTRODUCTION

- **Chapter 1: Basic concepts and units**
 - Dynamics
 - What is dynamics?
 - What will we learn?
 - Prerequisite knowledge
 - Units
 - Why units are important
 - Unit of measure
 - SI units
 - Metric system
 - US customary system
 - Basic concepts
 - Vectors
 - Space
 - Position
 - Time
 - Velocity
 - Acceleration
 - Force
 - Mass and weight
 - Calculus and dynamics
 - Solving dynamics problems
 - Universal gravitation
 - Chapter 1 review problems
 - Chapter 1 problems

PART II: KINEMATICS

- **Chapter 2: Kinematics of Particles Rectilinear Motion**
 - Rectilinear motion
 - Rectilinear motion
 - Rectilinear coordinate axis
 - Position
 - Displacement
 - Velocity
 - Acceleration
 - Solving rectilinear problems
 - The basic equations
 - Time dependent equations
 - Position dependent equations
 - Acceleration as a function of velocity
 - Constant acceleration equations
 - General notes
 - Erratic rectilinear motion
 - Solving rectilinear problems graphically

- Chapter 2 review problems
- Chapter 2 problems
- Chapter 2 activities
- **Chapter 3: Kinematics of Particles Curvilinear Motion**
 - Plane curvilinear motion: x - y coordinates
 - Plane curvilinear motion
 - Plane curvilinear motion: Cartesian coordinates (x - y)
 - Position
 - Displacement and total distance traveled
 - Velocity
 - Acceleration
 - Solving plane curvilinear problems
 - Projectile motion
 - Projectile motion
 - Falling
 - Solving projectile problems
 - Plane curvilinear motion: n - t coordinates
 - Normal - tangential coordinate system
 - Velocity
 - Acceleration
 - Circular motion
 - Plane curvilinear motion: polar coordinates
 - Polar coordinate system
 - Position
 - Velocity
 - Acceleration
 - Polar coordinates versus n - t coordinates
 - Choosing a coordinate system
 - Relative motion
 - Reference frame definitions
 - Absolute and relative motion
 - Constrained & dependent motion
 - Constrained & dependent motion
 - Ropes & pulleys
 - Solving rope & pulley problems
 - Linear bearings / collars
 - Slots
 - Joints
 - Surface contacts / cam and follower
 - Chapter 3 review problems
 - Chapter 3 problems
 - Chapter 3 activities
- **Chapter 4: Kinematics of Rigid Bodies**
 - Rigid body motion
 - What is a rigid body?
 - How does a rigid body move
 - Pure rotation
 - Rotation about a fixed axis
 - Angular kinematic relationships

- Velocity and acceleration of a point
 - Gears and belts
- General planar motion
 - Relative velocity and acceleration
 - Mechanisms
 - Constraints
 - Linear bearings / collars
 - Slots
 - Joints
 - Surface contacts
 - Analyzing mechanisms
- Instantaneous center of zero and known velocities
 - Instantaneous center of zero velocity
 - Rolling
- Relative sliding in mechanisms
- Chapter 4 review problems
- Chapter 4 problems

PART III: KINETICS – NEWTONIAN MECHANICS

- **Chapter 5: Particle Newtonian Mechanics**
 - Newtonian mechanics
 - Kinetics
 - Newtonian mechanics
 - Mass versus weight
 - Force
 - Acceleration
 - Newton's laws
 - Newton's first law
 - Newton's second law
 - Newton's third law
 - Typical forces acting on a body
 - Weight (W)
 - Normal Force (N)
 - Tension force (T)
 - Friction force (F_f)
 - Spring force (F_s)
 - Damping force (F_d)
 - Friction
 - Friction definition summary
 - Solving a friction problem
 - Free body diagrams
 - Applying Newton's second law
 - Newton's second law in rectangular coordinates
 - Newton's second law in normal-tangential coordinates
 - Newton's second law in polar coordinates
 - Newton's laws for systems of particles
 - Chapter 5 review problems
 - Chapter 5 problems
 - Chapter 5 activities

- Chapter 5 design problems
- **Chapter 6: Rigid Body Newtonian Mechanics**
 - Rigid body motion
 - Rigid body motion
 - Prerequisite knowledge
 - Center of mass / gravity
 - Center of mass for a system of particles
 - Center of mass for a rigid body
 - Moments
 - Perpendicular moment arm method
 - Force component method
 - Cross product method
 - Mass moments
 - Mass moment of inertia for a system of particles
 - Mass moment of inertia of a rigid body
 - Pure translation
 - Pure rotation
 - General planar motion with a center of mass reference
 - Kinetics of rolling
 - General planar motion
 - Chapter 6 review problems
 - Chapter 6 problems

PART IV: KINETICS – WORK & ENERGY

- **Chapter 7: Particle Work & Energy**
 - Work
 - Work done by a constant force
 - Work done by a non-constant force
 - Work in the $n-t$ coordinate system
 - Kinetic energy
 - Energy
 - Kinetic energy
 - Work-kinetic energy balance
 - Conservative & non-conservative forces
 - Potential energy
 - Potential energy
 - gravitational potential energy
 - elastic potential energy
 - Work-energy balance & conservation of energy
 - The work-energy balance equation
 - Conservation of energy
 - Work-energy for a system of particles
 - Work
 - Kinetic and potential energy
 - Work-energy balance
 - Power and efficiency
 - Power
 - Efficiency

- **Chapter 8: Rigid Body Work & Energy**
 - Work-Energy for systems of particles
 - Work
 - Kinetic energy
 - Potential energy
 - Work-energy balance
 - Work
 - Work done by a force
 - Work done by a pure couple (moment)
 - Kinetic energy
 - Pure translation
 - Pure rotation
 - Center of mass reference
 - General planar motion
 - Potential energy
 - Gravitational potential energy
 - Elastic potential energy
 - Work-energy balance
 - Work-energy balance equation
 - Conservation of energy equation
 - Work-Energy for a system of rigid bodies
 - Work
 - Kinetic and potential energy
 - Chapter 8 review problems
 - Chapter 8 problems

PART V: KINETICS – IMPULSE & MOMENTUM

- **Chapter 9: Particle Impulse & Momentum**
 - Linear momentum
 - Linear impulse
 - Linear impulse-momentum principle
 - Linear impulse-momentum for a system of particles
 - Conservation of linear momentum
 - Impact
 - Impact
 - Coefficient of restitution
 - Direct central impact
 - Oblique central impact
 - Angular momentum
 - Angular impulse
 - Angular impulse-momentum principle
 - Angular impulse-momentum for a system of particles
 - Conservation of angular momentum
 - Choosing a kinetic analysis method
 - Newtonian mechanics method
 - Work-energy method
 - Impulse-momentum method
 - Chapter 9 review problems
 - Chapter 9 problems

- **Chapter 10: Rigid Body Impulse & Momentum**
 - Linear impulse-momentum for systems of particles
 - Linear momentum
 - Particle linear momentum
 - Rigid body linear momentum
 - Linear impulse
 - Particle linear impulse
 - Rigid body linear impulse
 - Linear impulse-momentum principle
 - Linear impulse-momentum for systems of rigid bodies
 - Conservation of linear momentum
 - Angular impulse-momentum for systems of particles
 - Angular momentum
 - Particle angular momentum
 - Rigid body angular momentum
 - Pure translation
 - pure rotation
 - Rotation about the mass center G
 - General planar motion
 - Angular impulse
 - Particle angular impulse
 - Rigid body angular impulse
 - Angular impulse-momentum principle
 - Fixed-axis rotation about a fixed point O
 - Rotation about the center of mass G
 - Rotation about an arbitrary point P
 - Angular impulse-momentum principle for systems of rigid bodies
 - Conservation of angular momentum
 - Chapter 10 summary
 - Chapter 10 review problems
 - Chapter 10 problems

APPENDIX A: MOMENTS OF INERTIA

- Mass moments of inertia tables
- Mass moments of inertia
- Parallel axis theorem

APPENDIX B: MATH FOR DYNAMICS

- Geometry
- Algebra
- Trigonometry
- Vectors
- Calculus - Differentiation
- Calculus - Integration

APPENDIX C: UNITS & PROPERTIES

- Units
- Properties

APPENDIX D: EQUATIONS

- Equations
