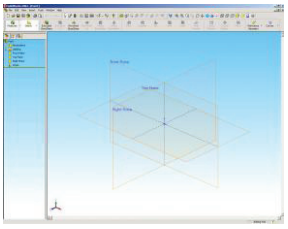
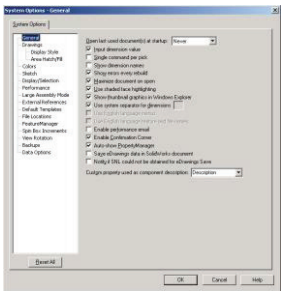
**Introduction:** **SolidWorks 2013 User Interface** **XXII**



The 3 references planes XXIII
The toolbars XXIII
The system feedback symbols XXV
The status bar XXV
2D sketch examples XXVI
3D feature examples XXVII

## Setting the System Parameters

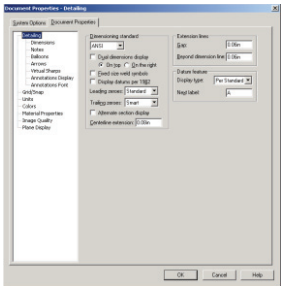
**Chapter 1**: **The system settings** **1-1**



The system options 1-1
The general options 1-2
The drawings options 1-2
The display type options 1-3
The area hatch options 1-3
The colors options 1-4
The sketch options 1-4
The relations / snaps options 1-5
The display / selection options 1-5
The performance options 1-6
The large assembly mode options 1-6
The external references options 1-7
The default templates options 1-7
The file location options 1-8
The feature manager options 1-8
The spin box increment options 1-9
The view rotation options 1-9
The backups / recover options 1-10
The hole wizards / toolbox options 1-10

The file explorer options 1-11
The search options 1-12
The collaboration / advanced option 1-13
Questions for review 1-14

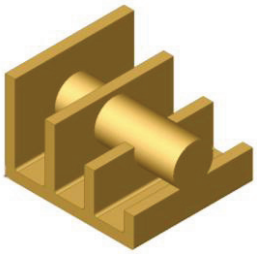
**Chapter 2: Document Templates 2-1**
Document properties 2-1
The drafting standard options 2-2
The annotations options 2-2
The balloon options 2-3
The datum options 2-3
The geometric tolerance options 2-4
The note options 2-4
The surface finish options 2-5
The weld symbol options 2-5
The dimensions options 2-6
The angle options 2-6
The arc length options 2-7
The chamfer options 2-7
The diameter options 2-8
The hole callout options 2-8
The linear options 2-9
The ordinate options 2-9
The radius options 2-10
The virtual sharp options 2-10
The table options 2-11
The bill of material options 2-11
The detailing options 2-12
The grid / snap options 2-12
The units options 2-13
The model display options 2-13
The material properties options 2-14
The image quality 2-14
The sheet metal options 2-15
The plane display options 2-15
The dimXpert options 2-16
The size dimension options 2-16
The location dimension 2-17
The chain dimension options 2-17
The geometric tolerance 2-18
The chamfer controls options 2-18
The display options 2-19



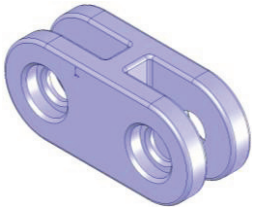
Saving the document template settings 2-19
Questions for review 2-20

# Basic Modeling Topics

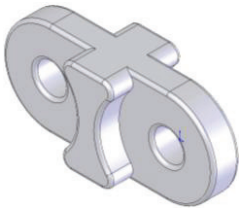
**Chapter 3: Basic Solid Modeling – Extrude Options 3-1**
Tools needed 3-2
Starting a new part 3-3
Changing the background color 3-4
Starting a new sketch 3-5
Using the line command 3-6
Adding geometric relation or constraints 3-7
Geometric relation examples 3-9
Adding dimensions 3-10
The status of a sketch 3-11
Hiding the sketch relation symbols 3-12
Extruding the base 3-13
Sketching on a planar face 3-14
Exploring the different extrude options 3-15
Extruding with blind 3-16
Extruding with through all 3-16
Extruding with up to next 3-16
Extruding with up to vertex 3-17
Extruding with up to surface 3-17
Extruding with offset from surface 3-17
Extruding with up to body 3-18
Extruding with mid-plane 3-18
Extrude summary 3-19
Adding fillets 3-20
Fillets and rounds 3-21
Questions for review 3-22
Exercise: Extrude Boss & Extrude Cuts 3-23



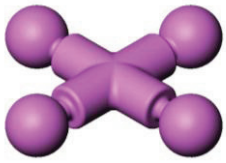
**Chapter 4: Basic Solid Modeling – Extrude and Revolve 4-1**
Tools needed 4-2
Sketching the first profile 4-3
Extruding the first solid 4-3
Waking up the entities 4-4
Cutting the bore holes 4-5
Using mirror 4-6

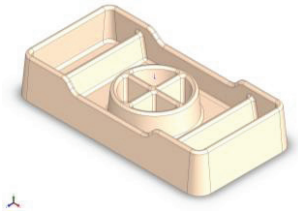


## Table of Contents



| | | |
|---|---|---|
| | Adding fillets | 4-8 |
| | Creating the sub-components | 4-10 |
| | Revolving the base | 4-10 |
| | Adding chamfers | 4-11 |
| | Using the straight slot command | 4-14 |
| | Create a blind cut | 4-16 |
| | Adding holes | 4-17 |
| | Adding more fillets | 4-18 |
| Questions for review | | 4-20 |
| Exercise: Extrude Boss and Extrude Cut | | 4-21 |
| **Chapter 5:** | **Revolve Parts – Ball Joint Arm** | **5-1** |
| Tools needed | | 5-2 |
| Creating the base profile | | 5-3 |
| | Trimming the entities | 5-3 |
| | Revolving the base | 5-3 |
| | Sketching the open-end profile | 5-4 |
| | Mirroring a features | 5-6 |
| | Adding fillets | 5-7 |
| Questions for review | | 5-8 |
| Exercise: Flat head Screw Driver | | 5-9 |
| | **Derived Sketches – Center Ball Joint** | **5-12** |
| Tools needed | | 5-13 |
| Creating the base profile | | 5-14 |
| | Revolving the base | 5-14 |
| | Creating a new plane | 5-15 |
| | Making a derived sketch | 5-15 |
| | Positioning the derived sketch | 5-16 |
| | Adding fillets | 5-17 |
| Questions for review | | 5-18 |
| Exercise: Revolve Parts | | 5-19 |
| Exercise: Modeling a plastic bottle | | 5-21 |
| **Chapter 6:** | **Rib & Shell Features – Formed Tray** | **6-1** |
| Tools needed | | 6-2 |
| Sketching the base profile | | 6-3 |
| | Extruding the base | 6-3 |
| | Creating the side cutout | 6-4 |
| | Offsetting the entities | 6-5 |
| | Shelling the upper half of the part | 6-5 |
| | Adding rib features | 6-6 |



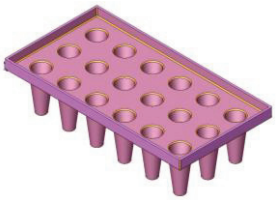


Adding fillets 6-7
Shelling the lower half of the part 6-8
Questions for review 6-9

**Using Shell and Mirror 6-10**
Tools needed 6-11
Starting a new part 6-12
Extruding the base 6-12
Adding fillets 6-13
Creating a recess feature 6-14
Creating the rim feature 6-16
Creating the fold feature 6-17
Mirroring the body 6-18
Creating the lock feature 6-19
Shelling the part 6-22

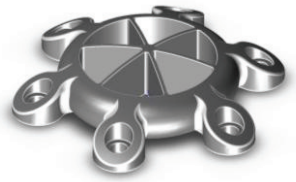
**Chapter 7:**

**Linear Patterns – Test Tray 7-1**
Tools needed 7-2
Sketching the base profile 7-3
Extruding the base feature 7-3
Creating the seed feature 7-4
Creating a linear pattern 7-5
Shelling the part 7-6
Adding fillets 7-7
Questions for review 7-8



**Circular Patterns – Spur Gear 7-9**
Tools needed 7-10
Creating the base sketch 7-11
Using dynamic mirror 7-11
Adding relations 7-12
Canceling auto-relations 7-12
Revolving the base 7-13
Sketching the thread profile 7-14
Using convert entities 7-15
Using trim entities 7-16
Enabling the temporary axis 7-17
Making a circular pattern of the cut 7-18
Adding the key-way 7-19

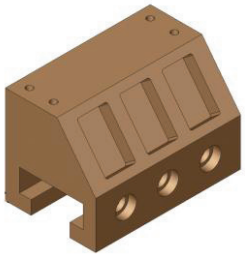
Using sketch mirror 7-20
Questions for review 7-22



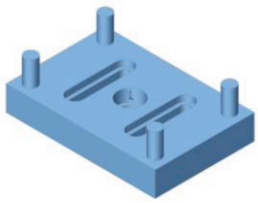
**Circular Patterns – Circular Base Mount** **7-23**
Tools needed 7-24
Sketching the base profile 7-25
Revolving the base 7-25
Adding a side tab 7-26
Creating the first counterbore 7-27
Adding a circular pattern 7-28
Creating a new offset plane 7-28
Adding the pockets 7-29
Adding fillets 7-30
Questions for review 7-32

**Curve Driven Patterns & Hole Wizard** **7-33**
Tools needed 7-34
Editing the sketch 7-35
Extruding the base 7-36
Creating the first hole 7-36
Constructing the Curve 7-37
Creating the Curve-Driven Pattern 7-38
Using the hole wizard 7-39
Using the curve driven pattern options 7-40

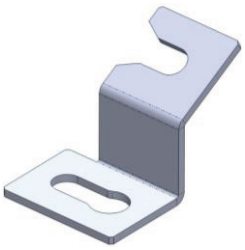
**Chapter 8:** **Part Configurations – Machined Block** **8-1**
Tools needed 8-2
Sketching the Base profile 8-3
Adding the ordinate dimensions 8-3
Extruding the Base 8-3
Adding the pockets 8-4
Adding a counterbore hole 8-5
Patterning the counterbore 8-6
Mirroring features 8-7
Adding the blind holes 8-8
Creating a cutaway section configuration 8-9
Switching between the configurations 8-12
Questions for Review 8-13
Exercise: Vary-Sketch Option 8-14



**Contour Selection** **8-15**
Using the Contour Selection 8-16



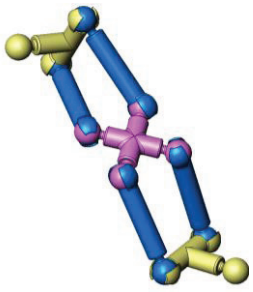
Opening the main sketch 8-18
Extruding the base 8-19
Using the contour selection tool 8-20
Hiding the sketch 8-28
Questions for review 8-29
Exercise: Contour Selection 8-30

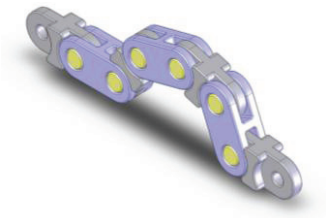


**Understanding and repairing errors** **8-32**
Error symbols and description 8-32
Error colors 8-32
Reading the error messages in what's wrong box 8-33
Viewing error messages from the Feature tree 8-33
Using display / delete relations 8-34
Replacing relations 8-35
Re-attaching dimensions 8-36
Setting over defined / not solved options 8-38
The status of the FeatureManager tree 8-39

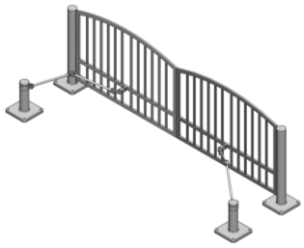
**Chapter 9: Modeling Threads – Threaded Insert** **9-1**
Tools needed 9-2
Sketching the base profile 9-3
Revolving the base 9-3
Creating the sweep path 9-4
Defining the helix 9-4
Creating the sweep profile 9-5
Creating the sweep cut 9-6
Mirroring the bodies 9-7
Adding chamfers 9-9
Questions for review 9-10
Exercise: Modeling threads - Internal 9-11
Exercise: Internal threads 9-15
Exercise: External threads 9-23

**Chapter 10: Bottom Up Assembly – Ball Joint Assembly** **10-1**
Tools needed 10-2
Starting a new assembly 10-3
Inserting the components 10-4
Mating the components 10-6
Moving / rotating components 10-7
Adding more components 10-7
Questions for review 10-11

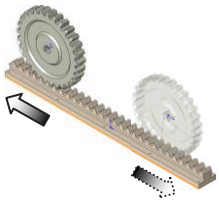




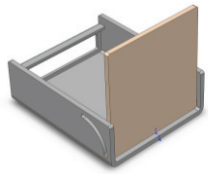
**Bottom Up Assembly – Links Assembly** **10-12**
Tools needed 10-13
Starting a new assembly templates 10-14
Inserting the first component 10-15
Adding other components 10-16
Changing the components colors 10-17
Using the selection filters 10-18
Adding standard mates 10-19
Adding width mates 10-20
Making copies of components 10-21
Viewing the mate group 10-22
Rotating components 10-23
Using align vs. anti-align 10-24
Questions for review 10-29
Assembly Exercises: Gate Assembly 10-12



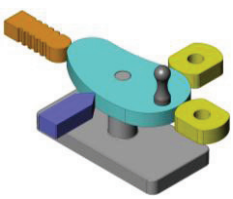
**Chapter 11:** **Using Advanced Mates** **11-1**
Rack and pinion mate 11-1
Adding mates 11-2
Suppressing mates 11-3
Using Mechanical Mates 11-3
Adding a rack and pinion mate 11-3
Testing the mates 11-4
Creating a linear motion 11-5
Adding a linear motor 11-5
Playing back the motion 11-6



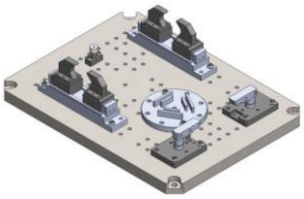
**Using Limit Mates and Cam Mates** **11-7**
Opening an assembly document 11-7
Adding advanced and mechanical mates 11-8
Adding a width mate 11-8
Adding a cam mate 11-9
Adding a limit mate 11-12
Testing the mates 11-13



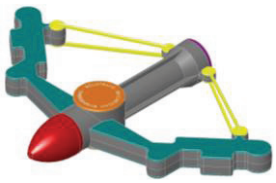
**Using Cam Followers** **11-15**
Opening and arranging the components 11-15
Adding the standard mates 11-16
Adding the mechanical mates - Cam follower 11-17
Viewing the cam motions 11-18



**Using Smart Mates** **11-19**

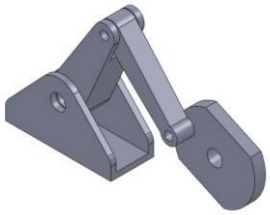


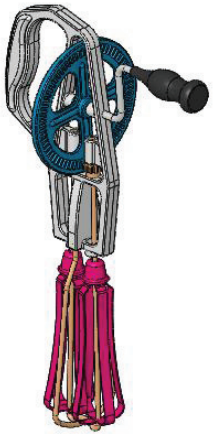
Fixture Assembly 11-20
Opening an assembly document 10-21
Exploring the smart mate options 11-22
Adding smart mates 11-23
Adding smart mates concentric & coincident 11-24
mating other components 11-26
Checking the status of the components 11-27
Creating instances of the bolt 11-28
Mating the bolts 11-29



**L1 Final Exam** **10-37**

**Chapter 12: Layout Assembly** **12-1**
Tools Needed 12-2
Opening an assembly document 12-3
Activating the layout mode 12-3
Adding a new sketch 12-4
Making a block 12-4
Setting the insertion point 12-5
Adding relations to the block 12-5
Adding dimensions to the blocks 12-6
Testing the block 12-7
Converting a block into a component 12-8
Converting other blocks 12-11
Hiding the sketches 12-14
Viewing the assembly motions 12-14

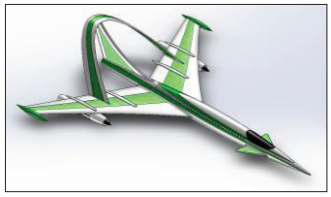




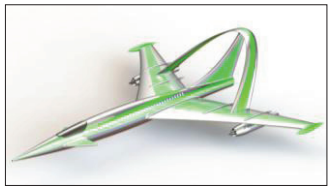
**SolidWorks Animator – The Basics** **12-15**
Switching to the Motion Study tab 12-15
Adding a rotary motor 12-16
Viewing the rotary motions 12-16
Using the animation wizard 12-17
Animating the explode / collapse 12-18
Changing the view orientation 12-21
Creating the flashing 12-25
Changing the shading options 12-27
Looping the animation 12-28
Saving as AVI format 12-29
Viewing with Windows Media Player 12-30

**Chapter 13: Working with Sketch Pictures** **13-1**
Tools needed 13-2

Inserting the scanned image 13-3
Resizing the digital image 13-4
Tracing the image 13-5
Using the spline tool 13-5
Suppressing the scanned image 13-7
Extruding the traced sketch 13-8

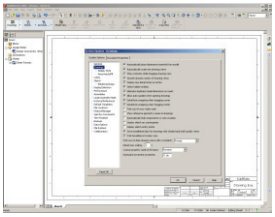


**Using PhotoView360 – The Basics 13-11**
Activating the add-in 13-11
Setting the appearance 13-12
Setting the scene 13-13
Setting the image quality 13-14
Rendering the final image 13-15
Saving the rendered image 13-16

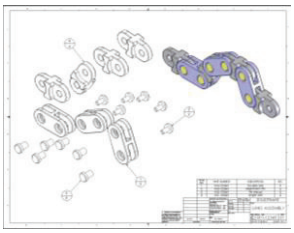


# Drawing Topics

**Chapter 14: Drawing Preparations 14-1**
Tools needed 14-2
Setting up new drawing 14-3
The drawing interface 14-4
Switching to the sheet format layer 14-5
Switching to the sheet layer 14-6
Setting the drawing options 14-7
Setting the document template options 14-8
Setting the drafting standard options 14-8
Setting the annotation option 14-8
Setting the dimension options 14-9
Setting the centerline / center mark options 14-9
Setting the bill of material options 14-10
Setting the view label options 14-11
Setting the unit options 14-12
Setting the line font options 14-13
Setting the line thickness options 14-13
Setting the image quality options 14-14
Saving the drawing templates 14-15
Questions for review 14-16

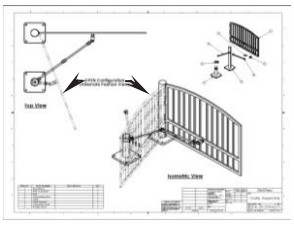


**Chapter 15: Assembly Drawings – Links Assembly 15-1**
Tools needed 15-2
Creating a new drawing format 15-3

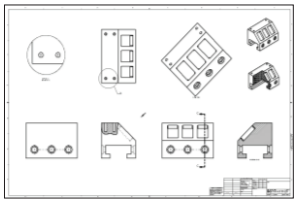


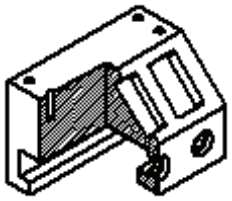
Editing the format / title block 15-5
Editing the sheet layer 15-6
Changing the drawing paper color 15-6
Browsing the documents 15-7
Switching to an exploded view 15-9
Creating the isometric views 15-11
Setting the custom scale to drawing views 15-12
Changing to the shaded view 15-12
Inserting the bill of material (BOM) 15-13
Modifying the bill of material 15-15
Reversing the column headers 15-16
Adding balloons 15-17
Using circular split line balloons 15-18
Questions for review 15-19
Assembly Drawing Exercises 15-20

**Assembly Drawing – Alternate Position View 15-23**
Tools needed 15-24
Setting up a new drawing 15-25
Setting the custom view scale 15-27
Creating an alternate position view 15-28
Switching configurations 15-30
Adding custom text / annotation 15-31
Creating the isometric exploded view 15-32
Using auto balloons 15-33
Adding a bill of material 15-34
Questions for review 15-35



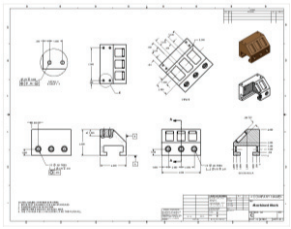
**Chapter 16: Drawing Views – Machined Block 16-1**
Tools needed 16-2
Setting up a new drawing format 16-3
Editing the format / title block 16-4
Modifying existing text 16-6
Adding new text 16-6
Using the view Palette 16-7
Dragging and dropping from the view Palette 16-8
Adding an isometric views 16-9
Moving the drawing views 16-10
Breaking the alignment of the views 16-11
Creating a detail views 16-12
Using the detail view options 16-12
Adding a projected views 16-13



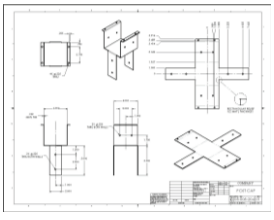


Creating an auxiliary views 16-14
Adding a cross section views 16-15
Showing / hiding the hidden lines 16-16
Creating the broken-out-section views 16-16
Changing configurations 16-18
Adding cross hatch and hatch patterns 16-19
Modifying the cross hatch properties 16-20
Using geometric tolerances and flag notes 16-22
Using the modifying and hole symbols 16-23
ANSI symbols description 16-24

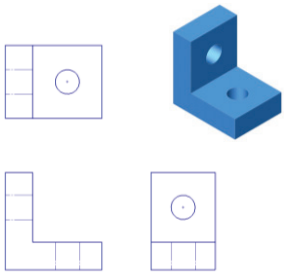
**Chapter 17: Detailing – Machined Block Details 17-1**
Tools needed 17-2
Inserting the model dimensions 17-3
Re-arranging the dimensions 17-4
Adding center marks 17-6
Adding datum feature symbols 17-7
Datum reference & geometric tolerance examples 17-8
Using the hole callouts 17-9
Adding the geometric tolerances 17-10
Adding tolerances / precisions 17-12
Adding surface finishes 17-15
Adding notes 17-16
Changing the document fonts 17-17
Questions for review 17-19
Exercise 1: Modeling and Detailing 17-20
Exercise 2: Drawing & Detailing 17-21
Fastener Callouts 17-22
Thread Nomenclature 17-23



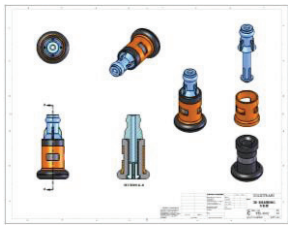
**Chapter 18: Sheet Metal Drawings – Post Cap 18-1**
Tools needed 18-2
Starting a new drawing 18-3
Inserting the 3 standard views 18-4
Creating the isometric and flat pattern views 18-5
Adding a detail view 18-6
Adding the ordinate dimensions 18-7
Inserting the model dimensions 18-7
Adding dimensions to other views 18-8
Creating an isometric flat pattern 18-9
Showing the bend lines 18-10



## Table of Contents



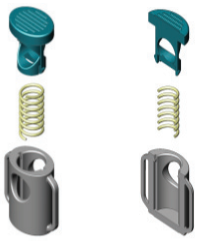
**2D to 3D - Convert AutoCAD into SolidWorks** **18-11**
Tools needed 18-12
Importing an AutoCAD drawing into SolidWorks 18-13
Importing options for DXF / DWG 18-14
The 2D to 3D toolbar 18-15
Converting the sketches 18-16
Aligning the views 18-19
Creating the base extrude 18-20
Converting the cut features 18-22
Hiding the sketches 18-25
Questions for review 18-27
Exercise: Modeling and Detailing 18-28



**e-Drawings – Soft Lock Assembly** **18-29**
Tools needed 18-30
Saving a SolidWorks drawing as an eDrawing 18-31
The eDrawing user interface 18-32
The eDrawing toolbar 18-33
The markup toolbar 18-34
Playing the animation 18-34
Adding markup notes 18-35
Adding a stamp 18-36
Saving as a self executable file type 18-37
3D drawing view 18-38
Creating a new 3D drawing View 18-39
Saving the drawing view state 18-39
Inserting a model view 18-40

**Chapter 19:**

**Configurations Part I: – Button Assembly** **19-1**
Tools needed 19-2
Part Configurations 19-3
Changing the pitch of the spring 19-4
Assembly configurations 19-5
Changing the mate conditions 19-6
Drawing configurations 19-7
Switching the configurations 19-8



**Configurations Part II: Assembly & Drawing** **19-9**
Tools needed 19-10
Opening the existing file 19-11
Adding new part configurations 19-11
Changing the number of spokes 19-12

Viewing the part configurations 19-13
Assembly configurations 19-14
Inserting the Sub-Assemblies 19-16
Adding mates to the sub-assembly 19-17
Viewing the assembly configurations 19-19
Starting a new drawing 19-20
Creating the drawing views 19-21
Creating an aligned section view 19-22
Changing the configurations in a drawing 19-25
Adding the annotations in a drawing 19-25

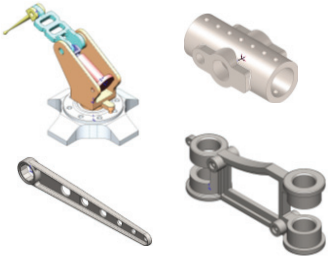
**Chapter 20: Part –Design Tables 20-1**

Tools needed 20-2
Part – design tables 20-3
Opening the an existing part 20-3
Inserting a new design table 20-4
Transferring dimensions to the design table 20-5
Using the excel-based formulas 20-5
Inserting features into the design table 20-7
Entering the suppress / un-suppress commands 20-8
Viewing the configs. generated by the design table 20-8

**Assembly – Design Tables 20-9**
Opening an assembly document 20-9
Creating a new assembly design table 20-10
Setting the headers alignment 20-10
Defining the column headers 20-11
Entering the excel-based parameters 20-13
Viewing the configs. generated by the design table 20-14
Exercise: Part design tables 20-15

**Level 2 final exam 20-19**
Table of U.S Measures 20-21
Table of U.S Measures 20-22

**CSWP-Core Preparation Practice**



Preparation materials for the CSWP-Core examination **21-1**
Part modeling and modifications 21-2
Configurations and design tables 21-22
Part modifications and repair errors 21-28
Bottom up assembly 21-37
