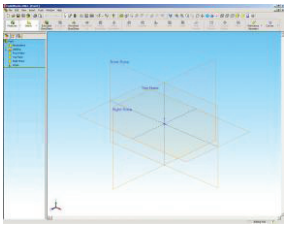
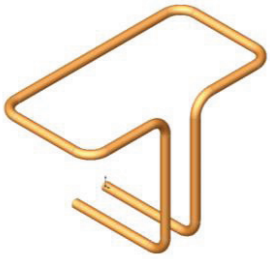
Introduction: **SolidWorks 2013 User Interface** **XIX**



The 3 references planes XX
The toolbars XX
The system feedback symbols XXII
The status bar XXII
2D sketch examples XXIII
3D feature examples XXIV

Advanced Modeling Topics

Chapter 1: **3D Sketch** **1-1**



Tools needed 1-2
Adding 3D lines 1-3
Using the reference axis indicator 1-4
Using the tab key 1-4
Adding dimensions 1-5
Adding the sketch fillets 1-6
Creating the Sweep profile 1-7
Making the swept feature 1-8
Questions for review 1-9
Exercise: Sweep with 3D Sketch 1-10
Exercise: 3D Sketch & Planes 1-11
Exercise: 3D Sketch & Composite Curves 1-18

Chapter 2: **Plane Creation** **2-1**
Tools needed 2-2
Sketching the base profile 2-3
Creating a tangent plane 2-4
Creating the flat surface 2-5
Extruding with flip side to cut 2-6

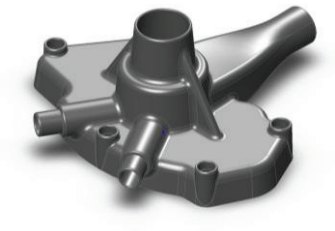
Table of Contents

	Creating a plane at angle	2-7
	Showing a sketch	2-8
	Creating a plane coincident	2-9
	Creating a plane parallel	2-10
	Creating a plane offset distance	2-12
	Creating Plane perpendicular	2-13
Creating a circular patterns		2-15
Creating a Mid-Plane		2-17
Filleting all edges		2-19
Questions for review		2-20
Viewing the sections		2-21
Exercise: Create new work planes		2-22
Chapter 3:	**Advanced Modeling – 5/8" Spanner**	**3-1**
Tools needed		3-2
Opening the part document		3-3
	Using min / max Arc conditions	3-4
	Creating the transition body	3-4
	Constructing a new work plane	3-6
Creating the close end		3-7
	Making a hexagon cut	3-8
	Adding a recess feature	3-9
	Mirroring the recess	3-10
Adding fillets		3-11
Adding text		3-13
	Extruding the text	3-14
Questions for review		3-17
Exercise: Circular text wraps		3-19
Chapter 4:	**Sweep w/ Composite Curve – Helical Ext. Spring**	**4-1**
Tools needed		4-2
	Creating the Sweep path	4-3
	Defining the Helix	4-3
Creating a plane at angle		4-4
Adding other Hook features		4-5
Creating a parallel plane		4-6
Combining sketches using Composite Curve		4-8
Creating Sweep profile		4-9
	Creating the Base Sweep	4-9
Other Spring examples		4-10
Questions for review		4-11
Exercise: Circular Spring – Expanded		4-12

Table of Contents

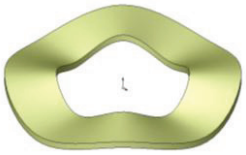
Sweep – Variable Pitch Spring, closed ends 4-15
Tools needed 4-16
Creating the base sketch 4-17
Creating a variable pitch helix 4-17
Sketching the sweep profile 4-18
Adding a pierce relation 4-18
Sweeping profile along path 4-19
Creating the flat ends 4-20
Questions for review 4-21
Exercise: Projected Curve & Composite Curve 4-22
Exercise: Using Curve Through Reference Points 4-27

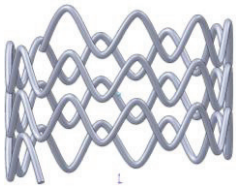
Chapter 5: **Advanced Modeling – Sweep vs. Loft** 5-1
Tools needed 5-2
Understanding the draft options 5-3
Opening the base 5-4
Creating the upper inlet port - revolve 5-5
Adding constant fillets 5-6
Creating an offset distance planes 5-7
Creating the outlet port - Loft 5-10
Adding the mounting bosses 5-11
Creating the rear inlet port 5-12
Adding face Fillets 5-13
Mirroring features 5-15
Shelling the part 5-16
Adding the ribs 5-17
Mirroring the ribs 5-18
Removing the sharp edges 5-19



Chapter 6: **Loft – Water Meter Housing** 6-1
Tools needed 6-2
Constructing the body 6-3
Creating an offset distance plane 6-5
Creating loft profiles / features 6-5
Constructing the Inlet / outlet profiles 6-6
Using split entities 6-6
Re-using the previous sketch 6-8
Constructing the centerline parameter 6-10
Creating the solid loft feature 6-11
Using the shell command 6-13
Adding the left / right brackets 6-14
Adding the seal ring 6-15

	Adding fillets /chamfers	6-18
	Questions for review	6-19
	Exercise: Loft	6-20
Chapter 7:	**Loft with Guide Curves – Waved Washer**	**7-1**
	Tools needed	7-2
	Adding the construction geometries	7-3
	Creating a offset distance plane	7-4
	Creating a derived sketches	7-5
	Creating a curve through reference points	7-5
	Constructing the loft sections	7-7
	Creating the derived sketches	7-7
	Creating the loft feature	7-10
	Showing / hiding sketches	7-11
	Questions for review	7-12
	Exercise: V-Shape – 3 revolutions	7-13
	Deforming a solid	**7-21**
	Deform with curve-to-curve	7-21
	Setting the anchor faces	7-22
	Setting the stiffness	7-22
	Deforming a surface	7-23
	Deform with curve-to-curve	7-23
	Setting the anchor edges	7-24
	Mirroring a body	7-24
Chapter 8:	**Surfaces – Lofted Surface**	**8-1**
	Tools needed	8-2
	Creating offset distance plane	8-3
	Constructing the loft profiles	8-3
	Creating the loft surface	8-6
	Setting the start/end constraints	8-6
	Splitting surfaces	8-7
	Deleting surfaces	8-8
	Thickening surfaces	8-9
	Calculating the angle between faces	8-11
	Adding a full round fillet	8-12
	Sketching / extruding the slot contours	8-14
	Questions for review	8-17

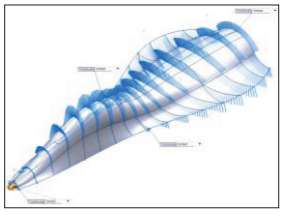




Lofted Surface – Remote Control Casing 8-19
Tools needed 8-20
Creating offset distance planes 8-21
Sketching the loft sections 8-22
Twisting the loft profiles 8-23
Creating the loft surface 8-24
Adding revolved surface 8-25
Copying / moving surfaces 8-26
Trimming surfaces 8-27
Hiding surfaces 8-27
Filling surfaces 8-28
Knitting surfaces 8-30
Adding fillets 8-31
Thickening surfaces 8-32
Removing the upper half 8-33
Creating the lower half 8-35
Questions for review 8-37
Exercise: Loft_Delete Face 8-38

Chapter 9: **Advanced Surfaces – Surface_Offset_Ruled** 9-1
Tools needed 9-2
Using offset surface and rule surface 9-3
Creating the base loft 9-4
Using the splitting lines 9-5
Using offset surfaces 9-6
Using ruled surface 9-7
Using knit surfaces 9-8
Creating a cut with surface 9-10
Exercise: Advanced modeling with surfaces 9-13
Exercise: Advanced surfacing techniques 9-15

Chapter 10: **Using Filled Surfaces** 10-1
Tools needed 10-2
Enabling the surfaces tool tab 10-3
Creating a planar surface 10-4
Creating a surface filled with tangent control 10-4
Creating a surface filled with curvature control 10-5
Knitting all surfaces 10-7
Creating a solid body 10-7
Questions for review 10-8

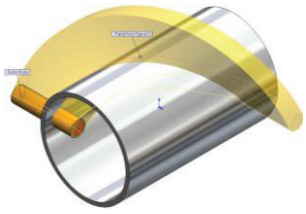


Creating a boundary and free-form feature 10-9

Table of Contents

Creating the 1st boundary surface 10-9
Creating the 1st boundary surface 10-12
Adding free-form curves 10-12
Adding free-form points 10-14
Dragging with the triad 10-16
Displaying the curvature comb 10-17

Sweep with Solid Body 10-19
Tools needed 10-20
Creating the main body 10-21
Creating an offset distance plane 10-22
Constructing the sweep path 10-23
Creating a plane normal to curve 10-23
Revolving the swept body 10-24
Creating the sweep cut with a solid body 10-25

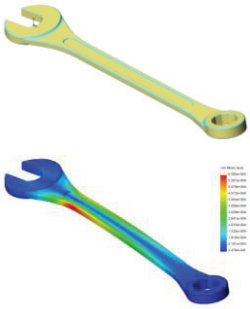


Chapter 11: Surfaces vs. Solid Modeling - Helmet 11-1
Tools needed 11-2
Constructing the body of Helmet – surface loft 11-3
Creating a perpendicular plane 11-4
Sketching the sweep profile 11-4
Sketching the sweep path 11-5
Adding a planar surface 11-5
Knitting the surfaces bodies 11-6
Thickening the surface Knit 11-7
Creating an extruded cut feature 11-8
Creating a revolve cut feature 11-9
Creating the Cut-out slot with draft 11-10
Creating a sweep cut 11-13
Adding fillets 11-13
Exercise: Advanced loft - Turbine Blades 11-15
Exercise: Advanced Sweep – Candle Holder 11-16

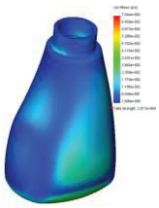
Using PhotoView 360 11-23
Activating the Add-Ins 11-23
Setting the appearance 11-24
Setting the scene 11-25
Setting the floor distance 11-26
Setting the illumination 11-26
Adjusting the render quality 11-27
Setting the image file type 11-27
Saving the final image 11-28

L3 – Final Exam 11-29

Chapter 12: **SimulationXpress – 5/8" Spanner** 12-1



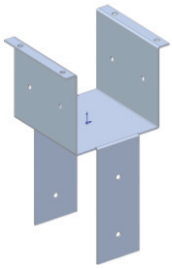
Tools needed 12-2
Starting SimulationXpress 12-3
Setting up the units 12-3
Adding a fixture 12-3
Adding load 12-6
Selecting material 12-7
Analyzing the model 12-8
Viewing the Results 12-9
Stress distribution 12-9
Displacement distribution 12-10
Factor of Safety (FOS) 12-10
HTML report 12-11
Viewing the report 12-13



eDrawings 12-15
Questions for review 12-19
Exercise: Apply load 12-20
Exercise: Apply pressure 12-21

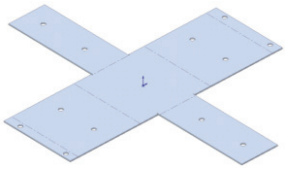
Sheet Metal Topics

Chapter 13: **Sheet Metal – Post Cap** 13-1

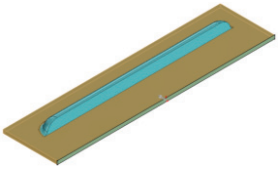


Tools needed 13-2
Creating the base sketch 13-3
Extruding with base Flange 13-3
Creating an edge Flange 13-4
Editing an edge Flange 13-5
Setting the auto-relief 13-5
Creating a sketch Bend 13-7
Adding holes in sheet metal parts 13-11
Making the pattern 13-13
Questions for review 13-14

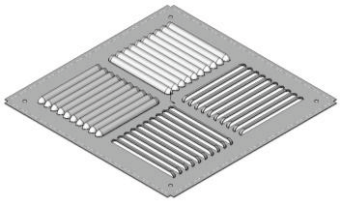
Sheet Metal - Vents 13-15



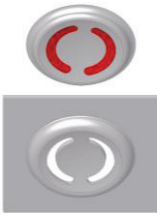
Tools needed 13-16
Creating the base sketch 13-17
Extruding with base-flange 13-18
Using the miter flange options 13-19



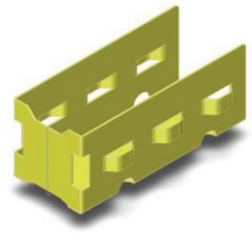
Creating a flat pattern 13-21
Creating a forming tool 13-22
The rectangle options 13-23
Revolve the form body 13-25
The position sketch 13-27
Save the forming tools 13-29
Applying the forming tools onto sheet metal part 13-30
Position the forming tool 13-31
Adding other sheet metal features 13-33
Creating a Linear pattern of the forming tools 13-34
Creating an axis 13-35
Creating Circular patterns 13-35
Questions for review 13-37

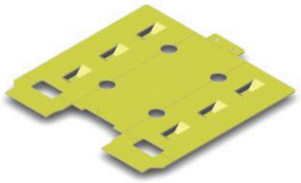


Chapter 14: Forming Tools – Button w/Slots 14-1
Tools needed 14-2
Sketching the base 14-3
Revolving the base 14-4
Adding slots 14-5
Creating the split lines 14-7
Defining the stopping & removing faces 14-9
Saving in the design library 14-10
Questions for review 14-12

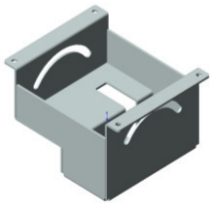


Sheet Metal – Mounting Tray 14-13
Tools needed 14-14
Creating the base flange 14-15
Adding an edge flange 14-16
Adding sheet metal cuts 14-17
Un-folding a sheet metal part 14-18
Folding the sheet metal part 14-20
Accessing the design library 14-23
Adding the bridge lance 14-24
Creating a linear pattern 14-26
Mirroring body 14-27
Sheet metal chamfers 14-30
Switching to the flat pattern 14-31
Questions for review 14-32

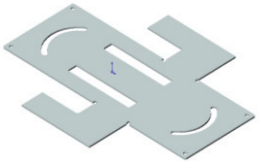




Chapter 15: Sheet Metal Conversions 15-1
Tools needed 15-2
Importing an IGES file 15-3



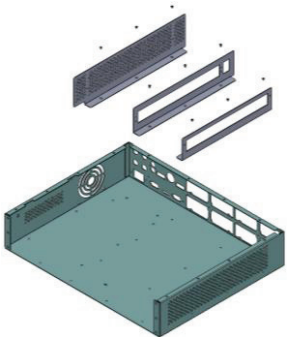
Using the rip command 15-4
Applying sheet metal parameters 15-5
Adding fillets 15-6
Creating a flat pattern 15-7
Questions for review 15-8



Flat Pattern Stent **15-9**
Tools needed 15-10
Revolving the main body 15-11
Converting to sheet metal 15-12
Unfolding the sheet metal part 15-12
Sketching the 2D pattern 15-13
Creating the 2D linear pattern 15-14
Folding the sheet metal part 15-15
Creating a configuration 15-16
Adding fillets 15-16
Switching to flat pattern 15-17

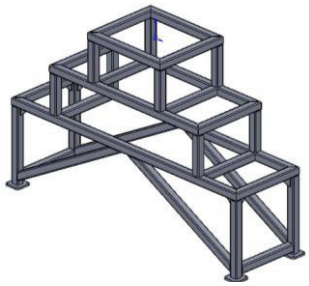
Stent example - Sheet metal approach **15-19**
Revolving the main body 15-19
Shelling the solid body 15-20
Creating an offset plane 15-21
Creating a rib feature 15-21
Patterning the rib feature 15-22
Creating a second rib 15-23
Patterning the second rib 15-23
Using the combine common 15-24
Transferring the part to an assembly 15-24
Creating a circular component pattern 15-25

Chapter 16: Working with Sheet Metal STEP files **16-1**
Tools needed 16-2
Opening an assembly step file 16-3
Mating the components 16-4
Adding the sheet metal tool tab 16-7
Inserting the sheet metal parameters 16-8
Switching to flat pattern 16-9
Converting other components 16-10
Using the hole series 16-11
Using the hole wizard 16-12
Adding the smart fasteners 16-15



Creating an assembly exploded view 16-17

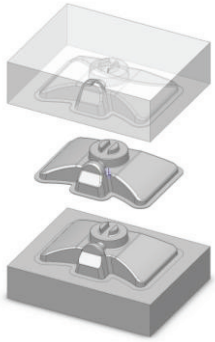
Weldments – Structural Members 16-18
Enabling the weldments toolbar 16-18
Adding the structural members 16-19
Setting the corner treatments 16-19
Adding the contiguous group 16-20
Adding the parallel group 16-21
Trimming the structural members 16-23
Adding the foot pads 16-30
Adding the gussets 16-31
Adding the weld beads 16-32
Viewing the weldments cut list 16-34
Updating the cut list 16-35
Creating a drawing 16-36
Inserting the cut list 16-36
Inserting the balloons 16-36

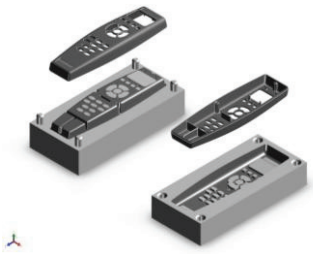


Top-Down Assembly Topics

Chapter 17: Top-Down Assembly – Core & Cavity Assembly Level 17-1
Tools needed 17-2
Opening the existing part 17-3
Applying scale to parts 17-3
Creating Radiate surfaces 17-4
Adding parts into an assembly document 17-5
Creating the core part 17-6
Knitting the surfaces 17-7
Hiding component 17-7
Extruding with up to surface 17-9
Editing part vs. edit assembly modes 17-10
Creating the cavity part 17-11
Creating an assembly exploded views 17-17
Animating the explode / collapse configurations 17-20
Questions for review 17-22

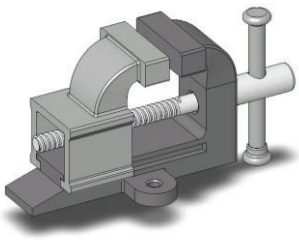
Tooling Design – Part Level 17-23
Tools needed 17-24
Opening the IGES file 17-25
Adding a Parting Lines 17-26





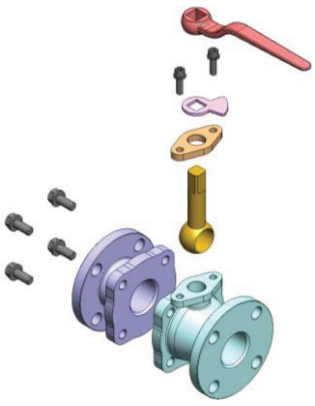
Using the shut off Surfaces command 17-27
Using Parting Surfaces 17-28
Using Tooling Splits 17-30
Saving the 2 halves 17-32
Separating the 2 halves 17-33
Questions for review 17-35

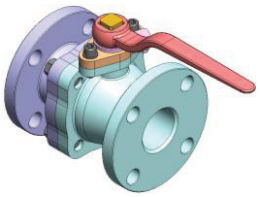
Chapter 18: Top-Down Assembly – Miniature Vise 18-1



Tools needed 18-2
Creating the base part 18-3
Adding side flanges 18-5
Creating an offsetting distance plane 18-7
Creating loft profiles and guide curves 18-8
Creating a loft with guide curves 18-11
Creating a new part in an assembly 18-14
Understanding the inplace mates 18-15
Offsetting existing geometry 18-16
Creating a loft with guide cure 18-20
Using loft with guide curve in an assembly 18-22
Extruding with up to surface option 18-25
Creating Internal threads 18-27
Making an assembly section view 18-30
Adding the sub-components 18-32
Questions for review 18-33

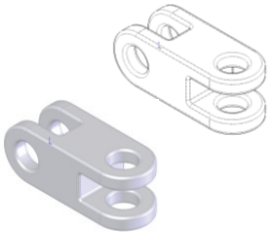
Chapter 19: Top-Down Assembly – Water Control Valve 19-1
Tools needed 19-2
Starting a new assembly document 19-3
Changing the units to IPS 19-3
Creating the 1st component 19-4
Revolving the base 19-5
Adding a flange 19-5
Adding mounting holes 19-6
Adding chamfers and fillets 19-8
Saving as virtual component 19-10
Creating the 2nd component 19-10
Extruding the boss 19-12
Adding the transition body 19-12
Adding a flange 19-13
Adding other features 19-14
Exiting the edit part mode 19-20
Applying dimension changes 19-20





Viewing the external references 19-22
Inserting other components 19-23
Mating the components 19-24
Creating an assembly exploded view 19-24
Exercise: Lips & Grooves for Plastic Parts 19-27
Exercise: Mounting Bosses for Plastic Parts 19-31

Chapter 20: External References & Repair Errors 20-1
Tools needed 20-2
Breaking all external references 20-3
Understanding External Reference symbols 20-4
Repairing Sketch level 20-5
Repairing / replacing relations and dimensions 20-6
Questions for review 20-8
Exercise: Repair Errors and External References 20-9



Level 4 Final Exam 20-17

CSWP Core Preparation Practice

Preparation materials for the CSWP-Core examination **21-1**
Part modeling and modifications 21-2
Configurations and design tables 21-22
Part modifications and repair errors 21-28
Bottom up assembly 21-37

Glossary
