Preface Acknowledgments	i ii
Introduction	
Introduction Development of Finite Element Analysis FEA Modeling Considerations Types of Finite Elements Finite Element Analysis Procedure Matrix Definitions Getting Started with SolidWorks Starting SolidWorks Units Setup SolidWorks Screen Layout Menu Bar Toolbar Menu Bar Pull-down Menus Heads-up View Toolbar Features Toolbar Sketch Toolbar Command Manager Feature Manager Design Tree Graphics Area Reference Triad Origin Confirmation Corner Graphics Cursor or Crosshairs Message and Status Bar Basic Functions of Mouse Buttons [Esc] — Canceling Commands On-Line Help Leaving SolidWorks Creating a CAD Files Folder	Intro-2 Intro-2 Intro-3 Intro-4 Intro-6 Intro-6 Intro-9 Intro-9 Intro-13 Intro-13 Intro-14 Intro-14 Intro-14 Intro-17 Intro-19 Intro-19 Intro-20
Chapter 1 The Direct Stiffness Method	
Introduction One-dimensional Truss Element Example 1.1 Example 1.2	1-2 1-3 1-5 1-7

Basic Solid Modeling using SolidWorks	1-10
The Adjuster Design	1-10
Starting SolidWorks	1-10
Step 1: Creating a Rough Sketch	1-12
Graphics Cursors	1-12
Geometric Relation Symbols	1-14
Step 2: Apply/Modify Relations and Dimensions	1-15
Changing the Dimension Standard	1-16
Viewing Functions – <i>Zoom</i> and <i>Pan</i>	1-17
Modifying the Dimensions of the Sketch	1-18
Step 3: Completing the Base Solid Feature	1-19
Isometric View	1-20
Rotation of the 3D Model – <i>Rotate View</i>	1-20
Rotation and Panning – Arrow Keys	1-22
Dynamic Viewing – Quick Keys	1-23
Viewing Tools – Heads-up View Toolbar	1-25
View Orientation	1-26
Display Style	1-27
Orthographic vs. Perspective	1-27
Customizing the Heads-up View Toolbar	1-27
Sketch Plane	1-28
Step 4-1: Adding an Extruded Boss Feature	1-30
Step 4-2: Adding an Extruded Cut Feature	1-33
Save the Part and Exit	1-35
Questions	1-36
Exercises	1-37
Chapter 2	
Truss Elements in Two-Dimensional Spaces	
Introduction	2-2
Truss Elements in Two-Dimensional Spaces	2-2
Coordinate Transformation	2-5
EXAMPLE 2.1	2-9
Solution	2-10
Global Stiffness Matrix	2-10
EXAMPLE 2.2	2-13
Solution	2-13
Questions	2-19
Exercises	2-20

Table of Contents

Questions Exercises 3-32 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements Starting SolidWorks 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model The SolidWorks Simulation Module 4-16	Chapter 3 2D Trusses in MS Excel and Truss Solver	
Assembly of the Overall Global Stiffness Matrix Solving the Global Displacements Calculating Reaction Forces 3-16 Determining the Stresses in Elements The Truss Solver and the Truss View Programs 7-23 The Truss View Program Questions Exercises 3-33 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model The SolidWorks Simulation Module Creating an FEA Model Assign the Element Material Property Applying Boundary Conditions - Constraints Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions Exercises Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Feliminary Analysis Starting SolidWorks 5-2 Preliminary Analysis Starting SolidWorks Units Setup Creating Structural Members in SolidWorks 5-8 Activate the SolidWorks Simulation Module 5-9 Activate the SolidWorks Simulation Module 5-9 Activate the SolidWorks Simulation Module	EXAMPLE 3.1	3-2
Solving the Global Displacements Calculating Reaction Forces Determining the Stresses in Elements 3-16 Determining the Stresses in Elements 3-18 The Truss Solver and the Truss View Programs 3-23 The Truss View Program 3-30 Questions 3-32 Exercises 3-33 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model 4-15 The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions 4-29 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Fereliminary Analysis 5-3 Starting SolidWorks Units Setup 5-5 Creating Structural Members in SolidWorks 5-8 Activate the SolidWorks Simulation Module 5-12		
Calculating Reaction Forces Determining the Stresses in Elements The Truss Solver and the Truss View Programs 3-23 The Truss View Program 3-30 Questions Exercises 3-33 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model Creating an FEA Model Creating an FEA Model Applying Boundary Conditions - Constraints Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions Exercises 4-20 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Ferliminary Analysis Finite Element Analysis Procedure 5-2 Preliminary Analysis 5-3 Starting SolidWorks Units Setup Creating the CAD Model – Structural Member Approach 5-6 Creating Structural Members in SolidWorks 5-8 Weldment Profiles Activate the SolidWorks Simulation Module 5-12	•	
Determining the Stresses in Elements The Truss Solver and the Truss View Programs 3-23 The Truss View Program 3-30 Questions Exercises 3-33 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model 4-16 Creating an FEA Model Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads 4-23 Create the FEA Mesh and Run the Solver Viewing the Displacement Results Questions Exercises 4-20 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Ferliminary Analysis Finite Element Analysis Procedure Freliminary Analysis 5-3 Starting SolidWorks Units Setup 5-5 Creating the CAD Model – Structural Member Approach 5-6 Creating Structural Members in SolidWorks 5-8 Weldment Profiles 5-9 Activate the SolidWorks Simulation Module 5-12	C i	
The Truss Solver and the Truss View Programs 3 - 30 Questions 3 - 32 Exercises 3 - 33 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4 - 2 Starting SolidWorks 4 - 4 Units Setup 4 - 5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model 4 - 16 Creating an FEA Model 4 - 17 Assign the Element Material Property 4 - 19 Applying Boundary Conditions - Constraints Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions Exercises 4 - 30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis Starting SolidWorks Units Setup Creating Structural Members in SolidWorks Setup Creating Structural Members in SolidWorks Setup Activate the SolidWorks Simulation Module 5 - 12	E	
The Truss View Program Questions 3-32 Exercises 3-33 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements Starting SolidWorks Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model 4-15 The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions 4-28 Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis 5-3 Starting SolidWorks Units Setup 5-5 Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks 5-8 Weldment Profiles 5-9 Activate the SolidWorks Simulation Module 5-12	<u> </u>	
Questions Exercises 3-32 Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads 4-23 Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis 5-3 Starting SolidWorks Units Setup Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles 5-9 Activate the SolidWorks Simulation Module 5-12	_	3-30
Chapter 4 Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach 4-6 A CAD Model is NOT an FEA Model 4-15 The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads 4-23 Create the FEA Mesh and Run the Solver 4-25 Viewing the Stress Results 4-26 Viewing the Displacement Results 4-28 Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure 5-2 Preliminary Analysis 5-3 Starting SolidWorks 5-5 Creating the CAD Model – Structural Member Approach 5-6 Creating Structural Members in SolidWorks 5-8 Weldment Profiles 5-9 Activate the SolidWorks Simulation Module 5-12	e e e e e e e e e e e e e e e e e e e	3-32
Truss Elements in SolidWorks Simulation One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model 4-15 The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results 4-25 Viewing the Displacement Results 4-26 Viewing the Displacement Results 4-27 Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis Starting SolidWorks 5-3 Starting SolidWorks 5-4 Units Setup 5-5 Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles 5-9 Activate the SolidWorks Simulation Module	Exercises	3-33
One-dimensional Line Elements 4-2 Starting SolidWorks 4-4 Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach 4-6 A CAD Model is NOT an FEA Model 4-15 The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads 4-23 Create the FEA Mesh and Run the Solver 4-25 Viewing the Stress Results 4-26 Viewing the Displacement Results 4-28 Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure 5-2 Preliminary Analysis 5-3 Starting SolidWorks 5-4 Units Setup 5-5 Creating the CAD Model – Structural Member Approach 5-6 Creating Structural Members in SolidWorks 5-8 Weldment Profiles 5-9 Activate the SolidWorks Simulation Module 5-12	•	
Starting SolidWorks Units Setup 4-5 Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model 4-15 The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads 4-23 Create the FEA Mesh and Run the Solver Viewing the Stress Results 4-26 Viewing the Displacement Results 4-28 Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis 5-3 Starting SolidWorks Units Setup 5-5 Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles 5-9 Activate the SolidWorks Simulation Module		4-2
Units Setup Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model The SolidWorks Simulation Module Creating an FEA Model Assign the Element Material Property Applying Boundary Conditions - Constraints Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions Exercises Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis Starting SolidWorks Units Setup Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles Activate the SolidWorks Simulation Module 4-5 4-6 4-6 4-6 4-6 4-6 4-6 4-6		
Creating the CAD Model – Solid Modeling Approach A CAD Model is NOT an FEA Model 4-15 The SolidWorks Simulation Module 4-16 Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads 4-23 Create the FEA Mesh and Run the Solver Viewing the Stress Results 4-26 Viewing the Displacement Results 4-28 Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis 5-3 Starting SolidWorks Units Setup 5-5 Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles 5-9 Activate the SolidWorks Simulation Module		
The SolidWorks Simulation Module Creating an FEA Model Assign the Element Material Property Applying Boundary Conditions - Constraints Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions Exercises Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis Starting SolidWorks Units Setup Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles Activate the SolidWorks Simulation Module 4-16 Creating Structural Members In SolidWorks S-12 Activate the SolidWorks Simulation Module	±	
Creating an FEA Model 4-17 Assign the Element Material Property 4-19 Applying Boundary Conditions - Constraints 4-20 Applying External Loads 4-23 Create the FEA Mesh and Run the Solver 4-25 Viewing the Stress Results 4-26 Viewing the Displacement Results 4-28 Questions 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure 5-2 Preliminary Analysis 5-3 Starting SolidWorks 5-4 Units Setup 5-5 Creating the CAD Model – Structural Member Approach 5-6 Creating Structural Members in SolidWorks 5-8 Weldment Profiles 5-9 Activate the SolidWorks Simulation Module 5-12		4-15
Assign the Element Material Property Applying Boundary Conditions - Constraints 4-20 Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions Exercises 4-29 Exercises 4-30 Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis Starting SolidWorks Units Setup 5-5 Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles Activate the SolidWorks Simulation Module 5-12	The SolidWorks Simulation Module	4-16
Applying Boundary Conditions - Constraints Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress Results Viewing the Displacement Results Questions Exercises Chapter 5 SolidWorks Simulation Two-Dimensional Truss Analysis Finite Element Analysis Procedure Preliminary Analysis Starting SolidWorks Starting SolidWorks Creating the CAD Model – Structural Member Approach Creating Structural Members in SolidWorks Weldment Profiles Activate the SolidWorks Simulation Module 4-20 4-25 4-26 4-27 4-28 4-29 4-29 5-2 5-2 Freliminary Analysis 5-3 Starting SolidWorks 5-4 Units Setup 5-5 Creating the CAD Model – Structural Member Approach 5-6 Creating Structural Members in SolidWorks 5-8 Weldment Profiles 5-9 Activate the SolidWorks Simulation Module	Creating an FEA Model	4-17

Weldment Profiles 5-9 Activate the SolidWorks Simulation Module 5-12		
Activate the SolidWorks Simulation Module 5-12		

Assign the Element Material Property Applying Boundary Conditions - Constraints and Loads Applying External Loads Create the FEA Mesh and Run the Solver Viewing the Stress results Viewing the Internal Loads of All members Viewing the Reaction Forces at the supports Questions Exercises	5-15 5-16 5-21 5-23 5-24 5-26 5-27 5-28 5-29
Chapter 6 Three-Dimensional Truss Analysis	
Three-Dimensional Coordinate Transformation Matrix	6-2
Stiffness Matrix	6-3
Degrees of Freedom	6-3
Problem Statement	6-5
Preliminary Analysis	6-5
Starting SolidWorks	6-7
Units Setup	6-8
Creating the CAD Model – Structural Member Approach	6-9
Creating Weldments Profiles in SolidWorks	6-12
Creating Structural Members using the New Profile	6-16
Editing the Dimensions of the New Profile	6-18
Activate the SolidWorks Simulation Module	6-19
Setting Up Truss Elements	6-21
Assign the Element Material Property	6-22
Applying Boundary Conditions - Constraints	6-23
Applying External Loads	6-24
Create the FEA Mesh and Run the Solver	6-26
Using the Probe Option to View Individual Stress	6-27
Viewing the Internal Loads of All Members	6-28
Questions	6-29
Exercises	6-30
Chapter 7 Basic Beam Analysis	
Introduction	7-2
Modeling Considerations	7-2 7-2
Problem Statement	7-2 7-3
Preliminary Analysis	7-3 7-3
Starting SolidWorks	7-3 7-6
Units Setup	7-0 7-7
CIIIVO O TVOP	, ,

	Table of Contents
Creating the CAD Model – Structural Member Approach	7-8
Creating a Rectangular Weldment Profile	7-10
Creating Structural Members using the New Profile	7-14
Adjusting the Orientation of the Profile	7-15
Adding a Datum Point for the Concentrated Load	7-16
Activate the SolidWorks Simulation Module	7-18 7-20
Assign the Element Material Property Applying Boundary Conditions - Constraints	7-20 7-21
Applying Concentrated Point Loads	7-21 7-24
Applying the Distributed Load	7-2 4 7-26
Create the FEA Mesh and Run the Solver	7-28
What Went Wrong?	7-29
Directions 1 and 2 in Shear and Moment Diagrams	7-32
Questions	7-34
Exercises	7-35
Chapter 8	
Beam Analysis Tools	
Introduction	8-2
Problem Statement	8-2
Preliminary Analysis	8-3
Stress Components	8-4
Starting SolidWorks Constitute the CAD Medial Streetweek Member Annuals	8-6
Creating the CAD Model – Structural Member Approach	8-7 8-9
Creating a Rectangular Weldment Profile Creating Structural Members using the New Profile	8-13
Adjusting the Orientation of the Profile	8-13 8-14
Adding a Datum Point	8-15
Activate the SolidWorks Simulation Module	8-17
Assign the Element Material Property	8-19
Applying Boundary Conditions - Constraints	8-20
Applying the Distributed Load	8-23
Create the FEA Mesh and Run the Solver	8-25
Shear and Moment Diagrams	8-26
Using the Probe Option to Examine Stress at Point1	8-28
Questions	8-29
Exercises	8-30
Chapter 9	
Statically Indeterminate Structures	
Introduction Problem Statement	9-2 9-3

vii

Preliminary Analysis	9-3
Starting SolidWorks	9-6
Creating the CAD Model	9-7
Creating a Circular Weldment Profile	9-9
Creating Structural Members using the New Profile	9-13
Adding a Datum Point for the Concentrated Load	9-14
Activate the SolidWorks Simulation Module	9-16
Assign the Element Material Property	9-18
Applying Boundary Conditions - Constraints	9-19
Applying the Concentrated Point Load	9-23
Create the FEA Mesh and Run the Solver	9-24
Viewing the Internal Loads of All members	9-25
Shear and Moment Diagrams	9-26
Questions	9-28
Exercises	9-29
Chapter 10	
Two-Dimensional Surface Analysis	
Introduction	10-2
Problem Statement	10-3
Preliminary Analysis	10-3
 Maximum Normal Stress 	10-3
Maximum Displacement	10-4
Geometric Considerations of Finite Elements	10-5
Starting SolidWorks	10-6
Creating a CAD Model in SolidWorks	10-7
Activate the SolidWorks Simulation Module	10-10
Defining a Surface Model	10-12
Assign the Element Material Property	10-13
Applying Boundary Conditions - Constraints	10-14
Applying the External Load	10-17
H-Element versus P-Element	10-20
Create the first 2D Mesh –Coarse Mesh	10-21
Run the Solver	10-23
Refinement of the Mesh–Global Element Size 0.10	10-25
Refinement of the Mesh-Global Element Size 0.05	10-27
Refinement of the Mesh-Global Element Size 0.03	10-29
Refinement of the Mesh-Global Element Size 0.02	10-30
Comparison of Results	10-31
Questions	10-32
Exercises	10-33

Table of Contents

Chapter 11 Three-Dimensional Solid Elements

Introduction	11-2
Problem Statement	11-3
Preliminary Analysis	11-4
Starting SolidWorks	11-7
Creating a CAD Model in SolidWorks	11-8
> Define the Sweep Path	11-8
> Define the Sweep Section	11-10
Create the Swept Feature	11-12
> Create a Cut Feature	11-13
Activate the SolidWorks Simulation Module	11-15
Assign the Element Material Property	11-17
Applying Boundary Conditions - Constraints	11-18
Applying the External Load	11-19
Create the first FEA Mesh –Coarse Mesh	11-20
Run the Solver	11-22
Refinement of the Mesh–Global Element Size 0.10	11-24
Refinement of the FEA Mesh – Mesh Control Option	11-26
Refinement of the FEA Mesh – Automatic Transition	11-29
Comparison of Results	11-31
Notes on FEA Linear Static Analyses	11-32
Questions	11-33
Exercises	11-34
Chapter 12 3D Thin Shell Analysis	
JD Tilli Glieli Alialysis	
Introduction	12-2
Problem Statement	12-4
Preliminary Analysis	12-4
Starting SolidWorks	12-6
Creating a CAD Model in SolidWorks	12-7
Activate the SolidWorks Simulation Module	12-9
Assign the Element Material Property	12-11
Applying Boundary Conditions - Constraints	12-12
Applying the External Pressure	12-14
Create the first FEA Mesh –Coarse Mesh	12-15
Run the Solver and View the Results	12-16
Refinement of the Mesh–Global Element Size 0.0125	12-17
Starting a New 3D Surface Model	12-18
Starting a New FEA Study	12-21
Completing the Definition of the Surface Model	12-22
Assign the Element Material Property	12-23

Applying Boundary Conditions - Constraints	12-24
Applying the External Pressure	12-28
Create the first FEA Mesh –Coarse Mesh	12-29
Run the Solver and View the Results	12-30
Refinement of the Mesh–Global Element Size 0.010	12-31
Questions	12-32
Exercises	12-33
01 4 40	
Chapter 13	
Dynamic Modal Analysis	
Introduction	13-2
Problem Statement	13-3
Preliminary Analysis	13-3
The Cantilever Beam Modal Analysis Program	13-6
Starting SolidWorks	13-9
Creating a CAD Model in SolidWorks	13-10
Activate the SolidWorks Simulation Module	13-12
Assign the Element Material Property	13-15
Create the first FEA Mesh	13-16
View the Results	13-18
Refinement of the Mesh–Global Element Size 0.15	13-21
Adding an Additional Mass to the System	13-23
One-Dimensional Beam Frequency Analysis	13-27
Conclusions	13-28
Questions	13-29
Exercises	13-30
