Setting the System Parameters

Chapter 1: System Options

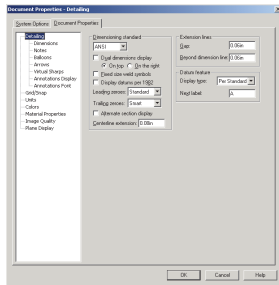

The general options
The drawings options
The display style options
The area hatch / fill options
The colors options
The sketch options
The relations / snaps options
The display / selection options
The performance options
The assemblies options
The external references options
The default templates options
The file locations options
The feature manager options
The spin box increment options
The view options
The backups / recover options
The hole wizards / toolbox options
The file explorer options
The search options
The collaboration / advanced options

Questions for Review	1-14
----------------------	------

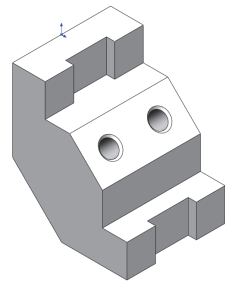

Chapter 2: Document Templates 2-1

Document properties	2-1
The drafting standard options	2-2
The annotations options	2-2
The balloon options	2-3
The datum options	2-3
The geometric tolerance options	2-4
The note options	2-4
The surface finish options	2-5
The weld symbol options	2-6
The dimensions options	2-6
The angle options	2-7
The arc length options	2-8
The chamfer options	2-8
The diameter options	2-9
The hole callout options	2-9
The linear options	2-10
The ordinate options	2-10
The radius options	2-11
The virtual sharp options	2-11
The table options	2-12
The bill of material options	2-12
The detailing options	2-14
The grid / snap options	2-14
The units options	2-15
The model display options	2-15
The material properties options	2-16
The image quality	2-16
The sheet metal options	2-17
The plane display options	2-17
The dimXpert options	2-18
The size dimension options	2-18
The location dimension	2-19
The chain dimension options	2-19
The geometric tolerance	2-20
The chamfer controls options	2-20
The display options	2-21
Saving the document template settings	2-22
Questions for Review	2-23

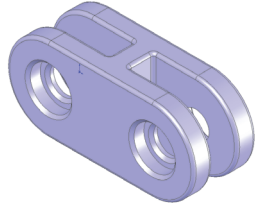

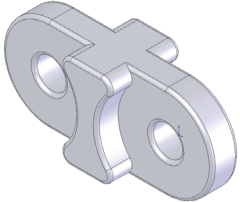

Basic Modeling Topics

	Chapter 3: Basic Solid Modeling – Extrude Options	3-1
	Tools Needed	3-2
	Starting a new part	3-3
	Changing the scene	3-4
	Starting a new sketch	3-5
	Using the line command	3-6
	Adding geometric relation or constraints	3-7
	Geometric relation examples	3-9
	Adding dimensions	3-10
	The status of a sketch	3-11
	Hiding the sketch relation symbols	3-12
	Extruding the base	3-13
	Sketching on a planar face	3-14
	Exploring the different extrude options	3-15
	Extruding with blind	3-17
	Extruding with through all	3-17
	Extruding with up to next	3-18
	Extruding with up to vertex	3-18
	Extruding with up to surface	3-18
	Extruding with offset from surface	3-19
	Extruding with up to body	3-19
	Extruding with mid-plane	3-20
	Extrude summary	3-21
	Adding fillets	3-22
	Fillets and rounds	3-23
	Questions for Review	3-24
	Exercise: Extrude Boss & Extrude Cut	3-25

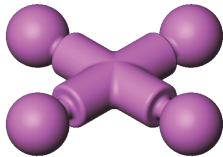

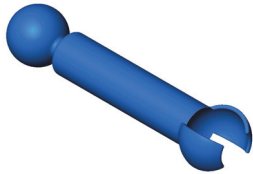

Chapter 4: Basic Solid Modeling – Extrude and Revolve

	Chapter 4: Basic Solid Modeling – Extrude and Revolve	4-1
	Tools Needed	4-2
	Sketching the first profile	4-3
	Extruding the first solid	4-3
	Waking up the entities	4-4
	Cutting the Bore holes	4-5
	Mirroring the Bore holes	4-6
	Adding fillets	4-8
	Creating the sub-components	4-10
	Revolving the base	4-10
	Adding chamfers	4-11

Using the straight slot command	4-14
Extruding a blind cut	4-16
Adding holes	4-17
Adding more fillets	4-18
Questions for Review	4-20
Exercise: Extrude Boss and Extrude Cut	4-21

Chapter 5: Revolved Parts – Ball Joint Arm

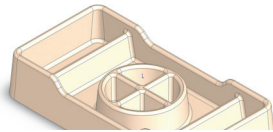

Chapter 5: Revolved Parts – Ball Joint Arm	5-1
Tools Needed	5-2
Creating the base profile	5-3
Trimming the entities	5-3
Revolving the base feature	5-4
Sketching the open-end profile	5-4
Mirroring features	5-6
Adding fillets	5-6
Questions for review	5-8
Exercise: Flat Head Screw Driver	5-9

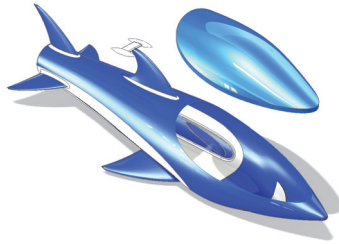

Derived Sketches – Center Ball Joint

Derived Sketches – Center Ball Joint	5-12
Tools Needed	5-13
Creating the base profile	5-14
Revolving the base	5-14
Creating a new plane	5-15
Making a derived sketch	5-15
Positioning the derived sketch	5-16
Adding fillets	5-17
Questions for Review	5-18
Exercise: Revolved Parts - Wheel	5-19
Exercise: Revolved Parts - Bottle	5-21

Chapter 6: Rib & Shell Features – Formed Tray

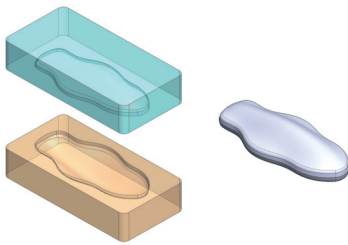

Chapter 6: Rib & Shell Features – Formed Tray	6-1
Tools Needed	6-2
Sketching the base profile	6-3
Extruding the base feature	6-3
Creating the side cutout	6-4
Offsetting the entities	6-5
Shelling the upper half of the part	6-5
Adding rib features	6-6
Adding fillets	6-7
Shelling the lower portion	6-8
Questions for Review	6-9

Using Shell and Mirror 6-10

Tools Needed	6-11
Starting a new part	6-12
Extruding the base	6-12
Adding fillets	6-13
Creating a recess feature	6-14
Creating the rim feature	6-16
Creating the fold feature	6-17
Mirroring the body	6-18
Creating the lock feature	6-19
Shelling the part	6-22
Questions for Review	6-25

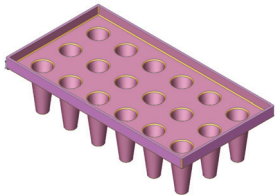

Using the Intersect Feature 6-27

Tools Needed	6-28
Creating a section view	6-31
Inserting a new part	6-31
Creating an Intersect Feature	6-32
Exercise: Using the Intersect Feature	6-35

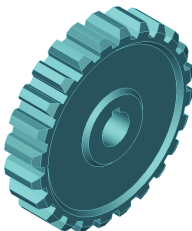

Chapter 7: Linear Patterns – Test Tray 7-1

Tools Needed	7-2
Sketching the base profile	7-3
Extruding the base feature	7-3
Creating the seed feature	7-4
Creating a linear pattern	7-5
Shelling the part	7-6
Adding fillets	7-7
Questions for Review	7-8

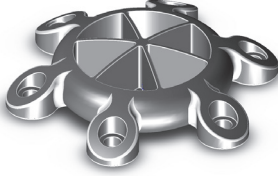

Circular Patterns – Spur Gear 7-9

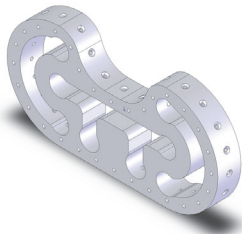

Tools Needed	7-10
Creating the base sketch	7-11
Using dynamic mirror	7-11
Adding relations	7-12
Canceling auto-relations	7-12
Revolving the base body	7-13
Sketching the thread profile	7-14
Converting the entities	7-15
Using trim entities	7-16
Enabling the temporary axis	7-17
Making a circular pattern of the cut	7-18

Adding the key-way	7-19
Using sketch mirror	7-19
Questions for Review	7-22

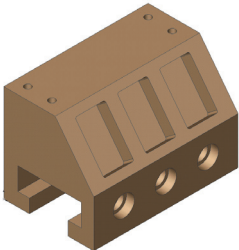

Circular Patterns – Circular Base Mount	7-23
Tools Needed	7-24
Sketching the base profile	7-25
Revolving the base	7-25
Adding a side tab	7-26
Creating the first counterbore	7-27
Adding a circular pattern	7-28
Creating a new offset plane	7-28
Adding the pockets	7-29
Adding fillets	7-30
Questions for Review	7-32

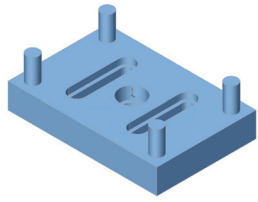

Curve Driven Patterns & Hole Wizard	7-33
Tools Needed	7-34
Editing the sketch	7-35
Extruding the base	7-36
Creating the first hole	7-36
Constructing the Curve	7-37
Creating the Curve-Driven Pattern	7-38
Adding the hole wizard	7-39
Creating the curve driven pattern options	7-40

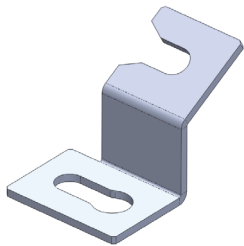

Chapter 8: Part Configurations – Machined Block **8-1**

Tools Needed	8-2
Sketching the Base profile	8-3
Adding the ordinate dimensions	8-3
Extruding the Base	8-3
Adding the pockets	8-4
Adding a counterbore hole	8-5
Patterning the counterforce	8-6
Mirroring features	8-7
Adding the blind holes	8-8
Creating a cutaway section configuration	8-9
Switching between the configurations	8-12
Splitting the FeatureManager pane	8-13
Suppressing features in a configuration	8-14
Questions for Review	8-15
Exercise: Using Vary-Sketch	8-16

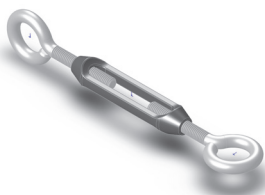

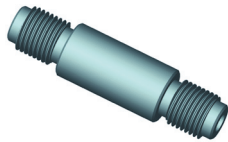

Contour Selection	8-17
Using the Contour Selection	8-18
Opening the main sketch	8-19
Extruding the base	8-20
Using the contour selection tool	8-21
Hiding the sketch	8-30
Questions for Review	8-31
Exercise: Contour Selection	8-32

Repairing Part Errors	8-35
Error symbols and description	8-35
Error colors	8-35
Viewing error messages from the Feature tree	8-36
The error messages in what's wrong box	8-37
Using display / delete relations	8-37
Replacing relations	8-39
Re-attaching dimensions	8-40
Setting over defined / not solved options	8-41

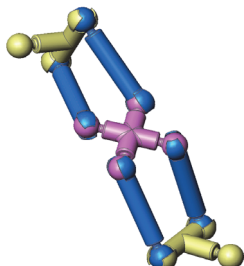

Chapter 9: Modeling Threads – Threaded Insert 9-1

Tools Needed	9-2
Sketching the base profile	9-3
Revolving the base feature	9-3
Creating the sweep path	9-4
Creating the helix	9-4
Sketching the sweep profile	9-5
Creating the sweep cut	9-6
Mirroring the bodies	9-7
Adding chamfers	9-9
Questions for Review	9-10
Exercise: Modeling Threads – Internal	9-11
Exercise: Internal Threads	9-15
Exercise: External Threads	9-23

Bottom Up Assembly Topics

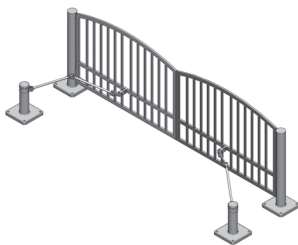

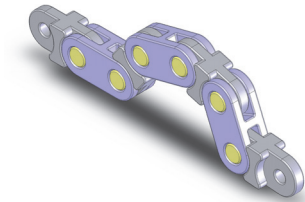

Chapter 10: Bottom Up Assembly – Ball Joint Assembly 10-1

Tools Needed	10-2
Starting a new assembly template	10-3
Inserting the components	10-4
Mating the components	10-6

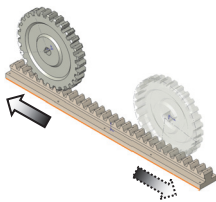

Moving / rotating components	10-7
Adding more components	10-7
Questions for Review	10-11

Bottom Up Assembly – Links Assembly **10-12**

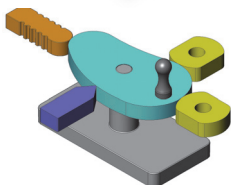

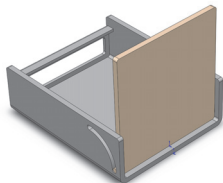

Tools Needed	10-13
Starting a new assembly template	10-14
Inserting the first component	10-15
Adding other components	10-16
Changing the components colors	10-17
Using the selection filters	10-18
Adding standard mates	10-19
Adding width mates	10-20
Making copies of components	10-21
Viewing the mate group	10-22
Rotating components	10-23
Using align vs. anti-align options	10-27
Questions for Review	10-29
Assembly Exercise: Gate Assembly	10-30

Chapter 11: Using Advanced Mates **11-1**

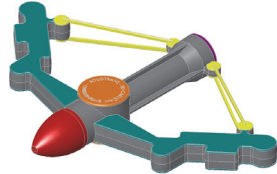

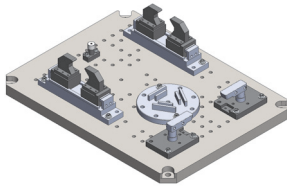

Rack and pinion mate	11-1
Adding mates	11-2
Suppressing mates	11-3
Using Mechanical Mates	11-3
Adding a rack and pinion mate	11-3
Testing the mates	11-4
Creating a linear motion	11-5
Adding a linear motor	11-5
Playing back the motion	11-6

Limit and Cam Mates **11-7**

Opening an assembly document	11-7
Adding advanced and mechanical mates	11-8
Adding a width mate	11-8
Adding a Cam mate	11-9
Adding a limit mate	11-12
Testing the mates	11-13
Exercise: Using Cam Followers	11-15
Opening and arranging the components	11-15
Adding the standard mates	11-16
Using the mechanical mates - Cam follower	11-17

Viewing the Cam motions	11-18
-------------------------	-------

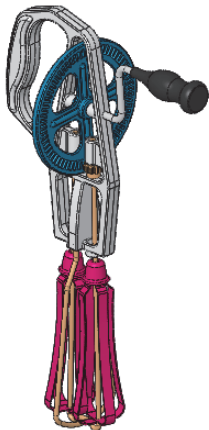

Using Smart-Mates 11-19

Fixture Assembly	11-20
Opening an assembly document	10-21
Exploring the smart mate options	11-22
Adding smart mates	11-23
Adding smart mates concentric & coincident	11-24
Mating other components	11-26
Checking the status of the components	11-27
Creating instances of the bolt	11-28
Mating the bolts	11-29
Questions for Review	11-32

Level 1 Final Exam 11-33

Chapter 12: Layout Assembly 12-1

Tools Needed	12-2
Opening an assembly document	12-3
Activating the layout mode	12-3
Adding a new sketch	12-4
Making a block	12-4
Setting the insertion point	12-5
Adding relations to the block	12-5
Adding dimensions to the blocks	12-6
Testing the block	12-7
Converting a block into a component	12-8
Converting other blocks	12-11
Hiding the sketches	12-14
Viewing the assembly motions	12-14

SolidWorks Animator – The Basics 12-15

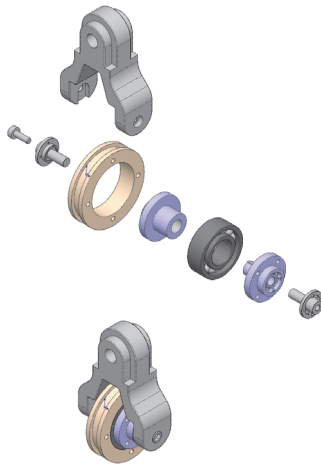

Switching to the Motion Study tab	12-15
Adding a Rotary Motor	12-16
Viewing the rotary motions	12-16
Using the Animation Wizard	12-17
Animating the explode / collapse	12-18
Changing the view orientation	12-21
Creating the flashing effects	12-25
Changing the shading options	12-27
Looping the animation	12-28
Saving as AVI format	12-29

Viewing with Windows Media Player	12-30
-----------------------------------	-------

Chapter 13: Working with Sketch Pictures 13-1

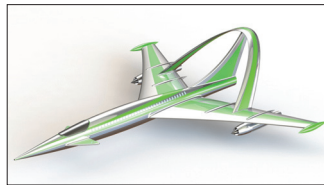

Tools Needed	13-2
Inserting the scanned image	13-3
Resizing the digital image	13-4
Tracing the image	13-5
Using the spline tool	13-5
Suppressing the scanned image	13-7
Extruding the traced sketch	13-8
Questions for Review	13-9

Working with MultiBody Parts 13-11

Tools Needed	13-12
Opening a multibody parts document	13-13
Creating a exploded view	13-14
Collapsing the exploded view	13-16
Inserting a new part	13-17
Adding mates to the new part	13-18
Creating a mirror plane	13-20
Mirroring a body	13-21
Editing the exploded view	13-26

PhotoView360 Basics 13-29

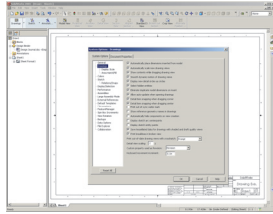

Activating the add-in	13-29
Setting the appearance	13-30
Setting the scene	13-31
Setting the image quality	13-32
Rendering the final image	13-33
Saving the rendered image	13-33

Drawing Topics

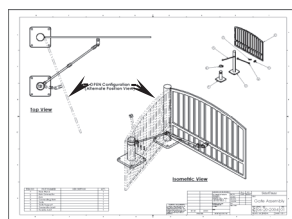

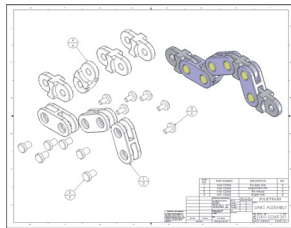

Chapter 14: Drawing Preparations 14-1

Tools Needed	14-2
Setting up new drawing	14-3
The drawing interface	14-4
Switching to the sheet format layer	14-5
Switching to the sheet layer	14-6
Setting up the drawing options	14-7

Setting the document template options	14-8
Setting the drafting standard options	14-8
Setting the annotations option	14-9
Setting the dimensions options	14-9
Setting the centerline / center mark options	14-10
Setting the bill of material options	14-10
Setting the view label options	14-11
Setting the units options	14-13
Setting the line font options	14-14
Setting the line thickness options	14-14
Setting the image quality options	14-15
Saving the drawing templates	14-16
Questions for Review	14-17

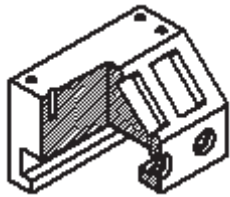

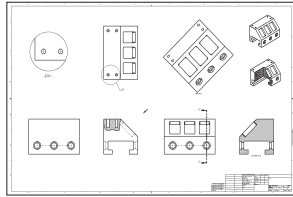

Chapter 15: Assembly Drawings – Links Assembly	15-1
Tools Needed	15-2
Creating a new drawing	15-3
Editing the format / title block	15-5
Editing the sheet layer	15-6
Changing the drawing paper color	15-6
Browsing the documents	15-7
Switching to an exploded view	15-9
Creating the isometric views	15-11
Setting the custom scale to drawing views	15-12
Changing to the shaded view	15-12
Inserting the bill of material (BOM)	15-13
Modifying the bill of material	15-15
Reversing the column headers	15-16
Adding balloons	15-17
Using circular split line balloons	15-18
Questions for Review	15-19
Assembly Drawing Exercises	15-20

Assembly Drawing – Alternate Position View	15-23
Tools Needed	15-24
Setting up a new drawing	15-25
Setting the custom view scale	15-27
Creating an alternate position view	15-28
Switching configurations	15-30
Adding custom text / annotation	15-31
Creating an exploded isometric view	15-32

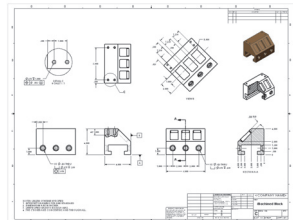

Using auto balloons	15-33
Adding a bill of material	15-34
Questions for Review	15-35

Chapter 16: Drawing Views – Machined Block **16-1**

Tools Needed	16-2
Setting up a new drawing format	16-3
Editing the format / title block	16-4
Modifying existing text	16-6
Adding new text	16-6
Using the view Palette	16-7
Dragging and dropping from the view Palette	16-8
Adding an isometric view	16-9
Moving the drawing views	16-10
Breaking the alignment of the views	16-11
Creating a detail views	16-12
Using the detail view options	16-12
Creating a projected view	16-13
Creating an auxiliary view	16-14
Adding a section view	16-15
Showing / hiding the hidden lines	16-16
Creating the broken-out-section views	16-16
Changing configurations	16-18
Adding cross hatch and hatch patterns	16-19
Modifying the cross hatch properties	16-20
Using geometric tolerances and flag notes	16-22
Using the modifying and hole symbols	16-23
ANSI symbols description	16-24

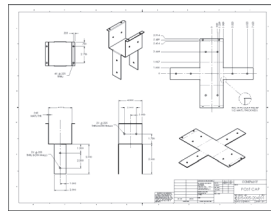

Chapter 17: Detailing – Machined Block Details **17-1**

Tools Needed	17-2
Inserting the model dimensions	17-3
Re-arranging the dimensions	17-4
Adding center marks	17-6
Adding the Datum Feature Symbols	17-7
Datum reference & geometric tolerance	17-8
Using the Hole-Callouts	17-9
Adding the geometric tolerances	17-9
Adding tolerances / precisions	17-13
Adding surface finishes	17-14
Adding notes	17-16
Changing the document's font	17-17

Questions for Review	17-19
Exercise: Detailing I	17-20
Exercise: Detailing II	17-21
Fastener Callouts	17-22
Thread Nomenclature	17-23

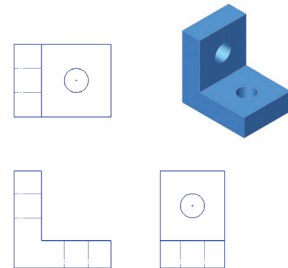

Chapter 18: Sheet Metal Drawings – Post Cap **18-1**

Tools Needed	18-2
Starting a new drawing	18-3
Creating the 3 standard views	18-4
Creating the isometric and flat pattern views	18-5
Creating a detail view	18-6
Adding the ordinate dimensions	18-6
Adding the model dimensions	18-7
Adding dimensions to other views	18-8
Creating the Isometric Flat Pattern view	18-9
Showing / Hiding the Bend lines	18-10

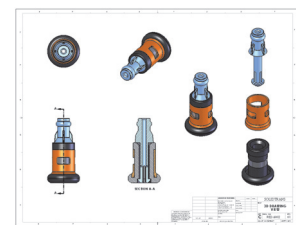

2D to 3D –

Convert AutoCAD into SolidWorks **18-11**

Tools Needed	18-12
Importing an AutoCAD drawing into SolidWorks	18-13
Importing options for DXF / DWG	18-14
The 2D to 3D toolbar	18-15
Converting the sketches	18-16
Aligning the views	18-19
Extruding the base feature	18-20
Converting the cut features	18-22
Hiding the sketches	18-25
Questions for Review	18-27
Exercise: Modeling & Detailing III	18-28

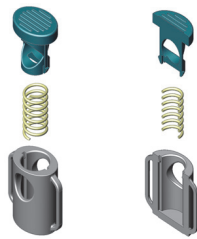

e-Drawings – Soft Lock Assembly **18-29**

Tools Needed	18-30
Saving a SolidWorks drawing as an eDrawing	18-31
The eDrawing user interface	18-32
The eDrawing toolbar	18-33
The markup toolbar	18-34
Playing the animation	18-34
Adding markup notes	18-35
Adding a stamp	18-36
Saving as a self executable file type	18-37

3D drawing view	18-38
Creating a new 3D drawing View	18-39
Saving the drawing view state	18-39
Inserting a model view	18-40

Chapter 19: Configurations Part I: – Button Assembly **19-1**

Tools Needed	19-2
Part Configurations	19-3
Changing the pitch of the spring	19-4
Assembly configurations	19-5
Changing the mate conditions	19-6
Drawing configurations	19-7
Switching the configurations	19-8

Configurations Part II: Assembly & Drawing **19-9**

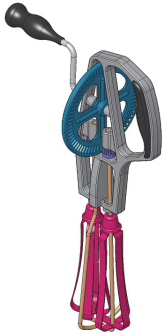

Tools Needed	19-10
Opening the existing file	19-11
Adding new part configurations	19-11
Changing the number of spokes	19-12
Viewing the part configurations	19-13
Assembly configurations	19-14
Inserting the Sub-Assemblies	19-15
Adding mates to the sub-assembly	19-17
Viewing the assembly configurations	19-19
Starting a new drawing	19-20
Creating the drawing views	19-21
Creating an aligned section view	19-22
Changing the configurations in a drawing	19-25
Adding the annotations in a drawing	19-25

Chapter 20: Part –Design Tables **20-1**

Tools Needed	20-2
Part – design tables	20-3
Opening the an existing part	20-3
Inserting a new design table	20-4
Transferring dimensions to the design table	20-5
Using the excel-based formulas	20-5
Inserting features into the design table	20-7
Entering suppress / unsuppressed commands	20-8

Viewing the configs. generated by the design table	20-8
Switching between configurations	20-8

Assembly – Design Tables	20-9
Opening an assembly document	20-10
Creating a new assembly design table	20-10
Setting the headers alignment	20-10
Defining the column headers	20-11
Entering the excel-based parameters	20-13
Viewing the configs. generated by the design table	20-14
Exercise: Part Design Tables	20-15

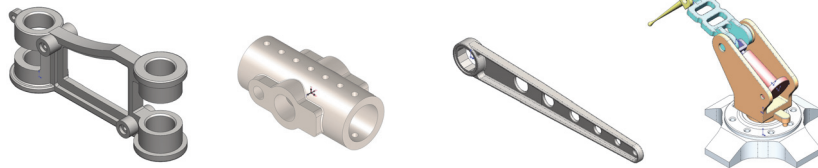

Level 2 Final Exams	20-19
Table of U.S Measures	20-21
Table of Metric Measures	20-22

CSWP-Core Preparation Practice

Preparation materials for the CSWP-Core Exam	21-1
Part Modeling and Modifications	21-2
Part Configurations and Design Tables	21-22
Part modifications	21-28
Bottom up Assembly	21-37
