The Complete Guide to

Mold Making with SOLIDWORKS® 2021

Basic through Advanced Techniques

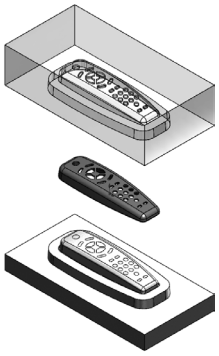
Table of Contents

Chapter 1: Plastic Part Design 1-1



Remote Control **1-1**
Starting a new part document 1-1
Creating the parent sketch 1-1
Extruding the main body 1-2
Making the upper curved cut 1-2
Adding fillets 1-3
Shelling the part 1-4
Making the recess sketch 1-5
Making the recess cut 1-6
Copying a sketch 1-7
Creating the mounting bosses 1-8
Adding the support ribs 1-9
Adding the mounting holes 1-10
Adding the rib fillets 1-11
Assigning material 1-12
Changing the part color 1-13
Calculating the mass 1-14

Creating the core and cavity molds **1-15**
Applying the scale factor 1-15
Creating the parting lines 1-15
Creating the shut-off surfaces 1-16
Creating the parting surfaces 1-17
Adding a reference plane 1-18
Inserting a tooling split 1-19
Separating the mold blocks 1-20
Hiding the references 1-21
Assigning material to the mold blocks 1-22

Exercise – Plastic Part Design 2 **1-23**
Opening a part document 1-23
Extruding the fins 1-23
Adding chamfers 1-24
Adding fillets 1-24
Applying scale 1-25
Creating the parting line 1-25
Adding the parting surfaces 1-26
Sketching the mold profile 1-26
Creating a tooling split 1-27

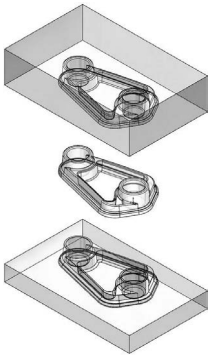
Trimming the mold blocks 1-27
Moving the front mold block 1-28
Moving the rear mold block 1-29
Hiding the reference surfaces 1-29
Saving your work 1-30

Chapter 2: Surface Repair 2-1

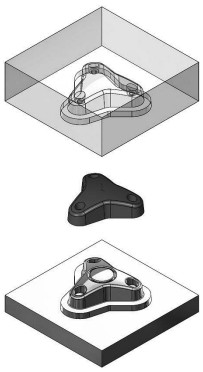
Mouse 2-1
Opening a parasolid document 2-1
Running Import Diagnostics 2-1
Examining the small surfaces 2-2
Deleting surfaces 2-3
Deleting hole 2-3

Patching the openings 2-4
Adding drafts 2-5
Creating a split line feature 2-6
Creating a face fillet 2-7
Adding thickness 2-8
Creating a recess cut 2-9

Chapter 3: Core and Cavity Creation 3-1



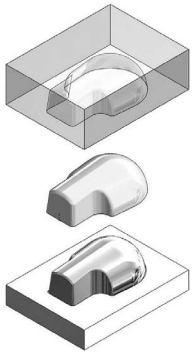
Plastic Tray 3-1
Opening a part document 3-1
Applying the scale factor 3-1
Creating the parting lines 3-2
Creating a parting surface 3-3
Making the mold block sketch 3-4
Creating a tooling split feature 3-5
Hiding the references 3-6
Assigning materials 3-7
Changing the transparency 3-7
Separating the mold blocks 3-8



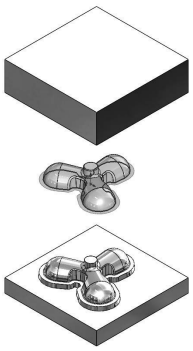
Exercise – Creating a Core and Cavity 3-11
Plastic Knob 3-11
Opening a part document 3-11
Applying the scale 3-11
Creating the parting lines 3-12
Creating the shut-off surfaces 3-13
Creating the parting surfaces 3-14
Adding a new plane 3-15
Making the sketch of the mold block 3-15

Inserting a tooling split feature 3-16
Separating the mold blocks 3-17

Chapter 4: Planar Parting Lines 4-1

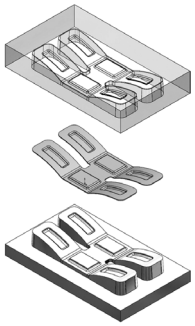


Drone's Canopy 4-1
Opening a part document 4-1
Scaling the part 4-1
Creating the parting lines 4-2
Creating the parting surfaces 4-3
Making the mold block sketch 4-4
Adding the move/copy command 4-5
Separating the mold blocks 4-6
Hiding the references 4-7
Renaming the mold blocks 4-8
Assigning the materials 4-8
Changing to transparency 4-9



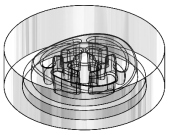
Exercise - Planar Parting Lines 4-11
Drone Cover Housing 4-11
Opening a part document 4-11
Scaling the part 4-11
Creating the parting lines 4-12
Creating the parting surfaces 4-13
Adding a new plane 4-14
Making the mold block sketch 4-15
Inserting a tooling split 4-15
Changing materials 4-16

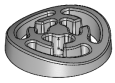
Chapter 5: Interlock Surface 5-1



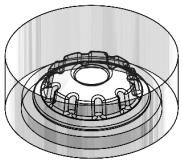
Stabilizer 5-1
Opening a part document 5-1
Applying the scale factor 5-1
Creating the parting lines 5-2
Creating the parting surfaces 5-3
Making the mold block sketch 5-4
Hiding the references 5-5
Separating the mold blocks 5-6
Changing the transparency 5-7

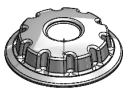
Interlock Surface 2 5-9
Plastic Cap 5-9
Opening a part document 5-9

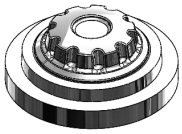




Applying the scale factor 5-9
Creating the parting lines 5-10
Adding the shut-off surfaces 5-11
Creating the parting surface 5-12
Adding a new plane 5-13
Making the mold block sketch 5-13
Creating a tooling split feature 5-14
Separating the mold blocks 5-15
Hiding the references 5-16
Renaming the solid bodies 5-17
Assigning materials 5-17
Changing the transparency 5-18

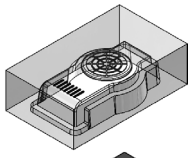


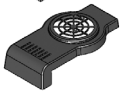


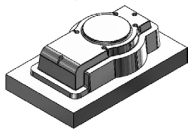


Exercise - Interlock Surface 3 **5-19**
Round Knob 5-19
Opening a part document 5-19
Applying the scale factor 5-19
Creating the parting lines 5-20
Creating the parting surfaces 5-21
Adding a new plane 5-22
Making the sketch of the mold block 5-22
Inserting a tooling split feature 5-23
Assigning materials 5-24

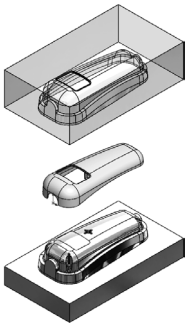
Chapter 6: Non-Planar Parting Lines 6-1
Fan Cover **6-1**
Opening a part document 6-1
Applying the scale factor 6-1
Creating the parting lines 6-2
Creating the shut-off surfaces 6-3
Creating the parting surfaces 6-4
Adding a new plane 6-4
Making the mold block sketch 6-5
Splitting the mold blocks 6-5
Hiding the references 6-6
Separating the mold blocks 6-7
Changing the transparency 6-8
Changing the materials 6-9







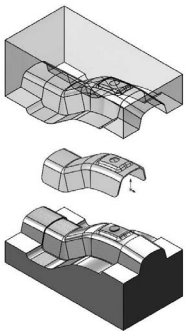
Exercise - Non-Planar Parting Lines **6-11**
Meter Reader Upper Housing 6-11
Opening a part document 6-11



Applying scale 6-11
Creating the parting lines 6-12
Creating the parting surfaces 6-13
Adding the ruled surfaces 6-14
Closing off the left end 6-15
Extending the lofted surface 6-15
Trimming the left end 6-16
Closing off the right end 6-17
Extending the lofted and ruled surfaces 6-18
Trimming the right end 6-19
Knitting all surfaces 6-20
Creating the shut off surfaces 6-21
Adding a new plane 6-21
Inserting a tooling split feature 6-22
Separating the mold blocks 6-23
Changing materials 6-24

Chapter 7: Manual Parting Lines 7-1

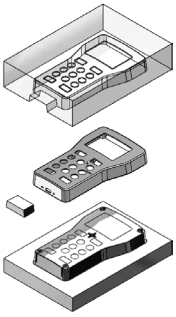
Heat Shield 7-1



Opening a part document 7-1
Applying the scale factor 7-1
Creating the parting lines 7-2
Creating the shut-off surfaces 7-3
Creating the parting surfaces 7-4
Deleting the surfaces 7-5
Creating the ruled surfaces 7-6
Trimming with a sketch 7-7
Making a 3D sketch 7-8
Creating the first corner patch 7-9
Patching other corners 7-10
Knitting the surfaces 7-11
Creating a reference plane 7-12
Creating a tooling split 7-13
Separating the mold blocks 7-14
Hiding the references 7-15
Changing the transparency 7-16

Chapter 8: Undercuts and Slide Cores 8-1

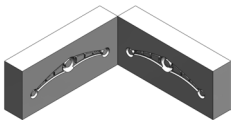
Stress Gauge Upper Housing 8-1
Opening a part document 8-1
Applying the scale factor 8-1
Creating the parting lines 8-2



Creating the shut-off surfaces 8-3
Creating the parting surfaces 8-4
Making the mold block sketch 8-5
Analyzing the undercuts 8-6
Sketching the slide core profile 8-7
Extruding the slide core block 8-8
Separating the mold blocks 8-9
Moving the slide core block 8-10
Hiding the references 8-11
Changing the transparency 8-12

Chapter 9: Alternative Methods 9-1

Using Combine Subtract – Rocker Arm 9-1



Opening a part document 9-1
Applying the scale factor 9-1
Making the mold block sketch 9-2
Extruding the mold block 9-2
Creating a combine subtract feature 9-3
Splitting a solid body 9-4
Rotating a solid body 9-5

Using Cut with Surfaces – Rocker Arm 9-6

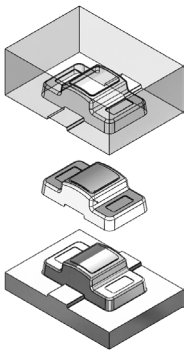
Opening a part document 9-6
Isolating the surface body 9-6
Making the mold block sketch 9-7
Converting to planar surface 9-8
Trimming the surfaces 9-9
Knitting the surfaces 9-10
Making the mold block sketch 9-11
Cutting with a surface 9-12
Moving a solid body 9-13

Using the Cavity Feature in Assembly – Rocker Arm 9-14

Opening an assembly document 9-14
Inserting the engineered part 9-14
Editing a component 9-15
Creating an exploded view 9-16

Chapter 10: Thickness Analysis 10-1

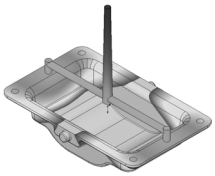
Medication Upper Case 10-1
Opening a part document 10-1



Setting the parameters 10-1
Analyzing the thickness 10-2
Creating a section view 10-3
Re-arranging the shell feature 10-4
Scaling the part 10-5
Creating the parting lines 10-5
Creating a parting surface 10-6
Adding a new plane 10-7
Making the mold block sketch 10-7
Extruding the mold blocks 10-8
Hiding the references 10-9
Separating the mold blocks 10-10
Changing the transparency 10-11

Chapter 11: Using the Plastics Wizard 11-1

Fill Tray 11-1



Opening a part document 11-1
Enabling SOLIDWORKS Plastics 11-1
Starting the wizard 11-2
Selecting material 11-4
Adding injection location 11-4
Running a flow analysis 11-5
Viewing the flow results 11-6
Completing the analysis 11-9

Chapter 12: Plastics Flow Analysis 12-1

Flow Simulation Analysis 12-1

Opening a part document 12-1
Enabling Plastics 12-1
Setting up the mesh 12-2
Viewing the PlasticsManager tree 12-3
Selecting a polymer 12-4
Adding an injection location 12-5
Running the flow analysis 12-6
Viewing the fill-time plot 12-7
Animating the results 12-8
Displaying the weld line 12-9
Viewing the results 12-10
