TAPLE OF CONTENTS

Introduction:SOLIDWORKS 2024 User InterfaceThe 3 reference planesThe toolbarsThe system feedback symbolsThe status bar2D sketch examples3D feature examples

Chapter 1:

Document Properties	1-1
Setting up the Document Template	1-1
Different standards in the world	1-2
Starting a new part document	1-3
Setting the ANSI drafting standards	1-3
Setting the dimension options	1-4
Setting the virtual sharp options	1-5
Setting the units options	1-5
Setting the image quality options	1-6
Saving the settings as a Part Template	1-6
Customizing Keyboard Shortcuts	1-7
Customizing Tool Buttons	1-12

Chapter 2:

Sketching Skills	2-1
Handle	2-1
Tools Needed	2-2
Starting a new part document	2-3
Changing the System Options	2-3
Creating the Parent Sketch	2-4
Revolving the parent sketch	2-7
Adding the tip detail	2-7
Revolving the sketch	2-8
Transitioning from line-to-arc	2-8
Mirroring in sketch mode	2-9
Adding dimensions	2-10
Extruding a cut	2-10

	Creating a circular pattern Adding other cut features Creating another circular pattern Adding a constant size fillet Assigning material to the model Calculating the mass of the model Saving your work Working with Sketch Pictures	2-11 2-12 2-13 2-14 2-15 2-16 2-16 2-17
	Using Contour Select Tool	2-37
Chapter 3:	Creating Multibody Parts	3-1
	Wooden Crate Tools needed	3-1 3-2
	Starting a new part document	3-2
	Sketching the first body profile	3-4
	Extruding the first body	3-6
	Copying the body	3-6
	Creating the upper plank	3-7
	Creating the first linear pattern	3-9
	Mirroring the planks	3-10
	Creating the lower plank	3-10
	Creating the second linear pattern	3-12
	Creating an exploded view	3-13
	Collapsing the view	3-15
	Saving your work	3-16
	Exercise: Combining Multibody Parts	3-17
Chapter 4:	Working with Multibody Parts	4-1
	Creating Mates & Exploded Views	4-1
	Tools needed	4-2
	Opening a part document	4-3
	Creating an exploded view	4-4
	Collapsing the solid bodies	4-6
100	Inserting another part	4-7
(TA)	Constraining the solid bodies	4-8
~ a ~	Adding a concentric mate	4-8
~~O.00000.	Adding a coincident mate	4-9
	Creating a new mirror plane	4-10
	Creating a mirror body	4-11
- Wa	Inserting another part	4-13
	Adding a concentric mate	4-14

Adding a coincident mate	4-14
Adding another instance of the bolt	4-15
Adding a concentric mate	4-15
Adding a coincident mate	4-16
Editing the exploded view	4-16
Saving your work	4-17
Working with Multibodies	4-19

Chapter 5:

Revolved and Thread Features	5-1
Cylinder	5-1
Tools needed	5-2
Opening a part document	5-3
Creating a revolved feature	5-3
Adding chamfers	5-4
Creating the mounting holes	5-4
Adding threads	5-7
Adding threads to the opposite end	5-9
Creating a zonal section view	5-11
Saving your work	5-12
Exercise: Revolved & Threads	5-13

- -

Chapter 6:

Flex Bending	6-1
Spanner	6-2
Tools needed	6-2
Flex Bending - Part 1	6-3
Opening a part document	6-3
Creating the first flex bending feature	6-3
Creating the second flex bending feature	6-5
Flex examples	6-6
Flex twisting	6-6
Flex stretching	6-6
Flex tapering	6-7
Flex bending	6-7
Flex Bending - Part 2	6-8
Opening a part document	6-8
Creating a flex bending	6-8
Creating a linear pattern	6-10
Exercise: Flex Bending a Car Tire	6-11
Using the Deform feature	6-13
Opening a part document	6-13
Creating a Curve-to-Curve deform	6-13

6-14

Save and close

Opening a part document	6-15
	6-15
	6-16
-	6-16
	6-17
6	6-19
	6-23
Sweep with Guide Curves	7-1
Plastic Bottle	7-1
Tools needed	7-2
Opening a part document	7-3
	7-3
. .	7-5
	7-6
6	7-7
	7-8
-	7-8
Creating the first knit surface	7-9
Adding the first fillet	7-9
Making the first cut with surface	7-10
-	7-11
Creating the second offset surface	7-11
Creating the second knit surface	7-12
Adding the second fillet	7-12
Making the second cut with surface	7-13
Adding the third fillet	7-14
Creating a shell	7-14
Adding the neck feature	7-15
Revolving the sketch	7-16
Creating a new plane	7-16
Creating a helix	7-17
Sketching the thread profile	7-18
Making the threads	7-19
Rounding off the ends of threads	7-19
Revolving the sketch	7-20
Rounding off the opposite side	7-20
Sweep with Solid Body	7-21
Exercise: Sweep Cut using a Solid Body	7-28
Exercise: Sweep Using a Sketch Profile	7-34

Chapter 8:	Lofts and Boundaries	8-1
	Solar Boat	8-1
	Tools needed	8-2
	Opening a part document	8-3
	Creating a lofted feature	8-3
	Creating a boundary feature	8-5
AT.	Creating the wing	8-6
	Creating the wing support	8-7
	Constructing the nose feature	8-8
	Creating the horizontal tail fins	8-11
	Creating the vertical tail fin	8-12
	Creating a split line	8-13
	Creating the canopy's first profile	8-14
	Creating a new plane	8-15
	Sketching the guide curve	8-15
	Creating the canopy's second loft profile	8-16
	Creating the canopy's third loft profile	8-16
	Creating the canopy feature	8-17
	Creating a mirror feature	8-17
	Adding fillets to the main body	8-18
	Adding fillets to the float and wing	8-18
	Adding fillets to the ends of the floats	8-19
	Adding fillets to the tail fins	8-19
	Adding fillets to the ends of the fins	8-20
	Creating a face fillet	8-20
	Creating a split line for the solar panels	8-21
	Changing color of the solar squares	8-22
and the second second	Changing the edge display	8-23
	Exercise: Surface & Solid Modeling	8-25
	Exercise: Using Split Lines	8-33

Chapter 9:

Surfaces and Patches	9-1
Welding Fixture	9-1
Tools needed	9-2
Opening a part document	9-3
Creating a swept surface	9-3
Creating the first extruded surface	9-4
Creating the second extruded surface	9-4
Creating the third extruded surface	9-5
Creating the first trimmed surface	9-5
Creating the second trimmed surface	9-6
Creating the third trimmed surface	9-7

Creating a lofted surface	9-9
Creating the first boundary surface	9-10
Creating the second boundary surface	9-11
Creating the first filled surface	9-12
Creating the second filled surface	9-13
Creating a face fillet	9-14
Knitting the surfaces	9-15
Thickening the surface model	9-16
Creating a section view	9-17
Changing the edge display	9-18
Exercise: Surface Modifications	9-19

Chapter 10:

Chapter 11:

Configure Features	10-1
Wooden Crate	10-1
Tools needed	10-2
Opening a part document	10-3
Configuring features	10-3
Saving the table	10-5
Adding a new configuration	10-5
Viewing the new configuration	10-6
Adding more configurations	10-7
Renaming a configuration	10-9
Inserting a design table	10-10
Exercise: Design Tables & Tabulated Tables	10-12

Assembly Motions & Mates	11-1
HeliDrone	11-1
Tools needed	11-2
Opening an existing assembly document	11-3
Using the width mate	11-3
Adding a concentric mate	11-4
Adding another concentric mate	11-6
Testing the assembly motions	11-6
Adding a limit-angle mate	11-7
Adding a parallel mate	11-8
Adding a gear mate	11-9
Testing the assembly motions	11-10
Radial Explode	11-11
Opening an existing assembly	11-11
Creating the first pattern driven	11-11
Creating the second pattern driven	11-12

Creating the first radial exploded view	11-13
Creating the second radial exploded view	11-13
Verifying the exploded view	11-14
Exercise: Assembly Motions	11-15

Chapter 12:

Using Smart-Mates	12-1
Fixture Assembly	12-1
e e	
Tools Needed	12-2
Opening an existing assembly document	12-3
Enabling the selection options	12-3
Exploring the Smart-Mate options	12-4
Using Smart-Mate Concentric	12-5
Creating a Smart-Mate Concentric & Coincident	12-6
Repeating the previous mate	12-7
Mating other components	12-8
Checking the status of the components	12-9
Switching configuration	12-9
Creating an instance of the bolt	12-10
Creating another instance of the bolt	12-11
Adding more bolts	12-12
Repeating	12-13
Using Mate Controller	12-15
Using copy with mates	12-25

Chapter 13:	Introduction to Top Down Assembly	13-1
-	Car Remote Control Housing	13-1
	Tools Needed	13-2
	Opening a part document	13-3
	Making an assembly from part	13-3
	Placing the first component	13-4
	Creating a new part	13-4
	Converting the entities	13-5
	Extruding the sketch	13-6
	Adding the fillet	13-6
	Shelling the part	13-7
	Hiding a component	13-7
	Adding features to the part	13-8
	Creating offset entities	13-9
	Extruding the sketch	13-10
	Adding the fillet	13-10
	Showing a component	13-11
	Creating a section view	13-11

13-12
13-14
13-15
13-16
13-17
13-29

Chapter 14:

Chapter 15:

Using the Lip & Groove Options	14-1
Lesson overview	14-1
Tools Needed	14-2
Using the Lip & Groove Options	14-3
Opening a part document	14-4
Editing the housing	14-4
Creating a section view	14-7
Using the Mounting Boss Tool	14-8
Opening an assembly document	14-9
Creating a mounting boss-hole feature	14-9
Setting the parameters	14-9
Hiding the Upper Half body	14-11
Creating the mating bosses	14-12
Creating a section view	14-14
Repeating	14-14

Accombly Drowings & DOM	15 1
Assembly Drawings & BOM	15-1
Aluminum Enclosure	15-1
Tools needed	15-2
Starting a new drawing document	15-3
Selecting the ANSI standard sheet size	15-3
Switching to ANSI standards	15-4
Using the view palette	15-5
Inserting a Bill of Materials	15-6
Modifying the BOM's Row Height	15-8
Adding a new column	15-8
Customizing the new column	15-9
Changing the color of the paper	15-10
Adding balloons	15-11
Adding an isometric view	15-12
Changing the display of a drawing view	15-13
Editing the sheet format	15-13
Switching back to the sheet	15-16
Reference reading: GD&T	15-18
Form examples	15-18

Orientation examples	15-19
Profile examples	15-19
Runout examples	15-20
Location examples	15-20
ASME – Y14.5 Symbol descriptions	15-22
Feature control frames	15-25
MMC maximum material condition	15-26
LMC least material condition	15-26

Description 0. De ta illing	1 (1
Drawings & Detailing	16-1
Front Cover Plate	16-1
Tools needed	16-2
Opening a part document	16-3
Creating the drawing views	16-4
Changing to phantom line style	16-6
Creating a partial section view	16-7
Flipping the section direction	16-8
Changing the hatch pattern	16-8
Creating a detail view	16-9
Inserting the model dimensions	16-10
Cleaning up the dimensions	16-11
Inserting dimensions to another view	16-12
Breaking the view alignment	16-13
Creating a projected view	16-14
Adding the centerline symbols	16-15
Adding datums	16-16
Adding a flatness tolerance	16-18
Adding a perpendicular tolerance	16-19
Copying the control frame	16-20
Modifying the geometric tolerance	16-21
Adding another position tolerance	16-22
Adding a symmetric tolerance	16-23
Adding a bilateral tolerance	16-23
Adding a limit tolerance	16-24
Adding a basic tolerance	16-24
Adding general notes	16-25
Filling out the title block	16-26
Exercise: Creating a drawing from a model	16-29
Exercise: Attaching a note or symbol to a dimension	16-30
Exercise: Creating an engineering drawing	16-53

Chapter 17:	SOLIDWORKS MBD	17-1
-	Introduction to Model Based Definition	17-1
	Tools needed	17-2
	Prismatic Parts	17-3
	Opening a part document	17-3
	Enabling SOLIDWORKS MBD	17-3
	Setting the options	17-3
	Adding datums	17-5
	Using scope	17-6
	Showing the constraint status	17-7
	Adding the size dimensions	17-8
	Showing the tolerance status	17-8
(°	Exercise: Adding the Size and Location Dimensions	17-9
	Turned Parts	17-13
	Capturing 3D Views	17-19
	Publishing PDF and eDrawing Files	17-23
	3D PDF Template Editor	17-30

Chapter 18:	Sheet Metal Parts	18-1
-	Hard Drive Enclosure	18-1
	Tools needed	18-2
ALL	Starting a new part document	18-3
	Creating the Base flange	18-4
· · · ·	Creating a cut feature	18-5
	Creating the first edge flange	18-6
	Creating the second edge flange	18-9
	Copying and pasting a sketch	18-11
	Creating more cuts	18-13
~	Creating a library feature cut	18-15
	Mirroring a feature	18-17
	Toggling the flat display	18-18
	Creating the flat pattern	18-19
	Accessing the sheet properties	18-20
	Sheet metal parts – Multibody Design	18-21
W	Using FeatureWorks – Feature Recognition	18-37

Chapter 19:	Plastic Parts	19-1
-	Plastic Part_Design1	19-1
	Tools Needed	19-2
	Making the base feature	19-3

E ~ ~	Creating a cut feature	19-4
	Adding the raised features	19-5
C C C C C C C C C C C C C C C C C C C	Adding fillets	19-6
	Shelling the model	19-6
	Making the interlock feature	19-7
	Creating a face fillet	19-8
	Adding another fillet	19-9
	Creating the side holes	19-10
	Plastic Part_Design2	19-11
	Extruding the base feature	19-11
4 6 6	Making the upper cut	19-12
	Creating a new plane	19-14
	Sketching the button holes	19-14
	Making the cut	19-15
	Shelling the model	19-16
	Adding a step cut	19-17
	Making the interlock feature	19-18
	Extruding a boss feature	19-19
	Adding a fillet	19-20
	Creating the flat-cable outlet cut	19-20
	Creating the LED holes	19-21
	Adding the mounting bosses	19-22
	Adding the mounting holes	19-23
	Adding a fillet	19-24
Chapter 20:	Casted Parts	20-1
	Casted Upper Housing	20-1
	Tools needed	20-2
	Creating the base	20-3
	Adding the counterbore holes	20-5
	Making the side support walls	20-8
	Adding drafts	20-9
	Mirroring multiple features	20-10
	Adding Ribs	20-11
SON.	Casted Valve Body	20-15
	Viewing the part/child relationships	20-16
68 6 1	Exercise: Casted Bracket	20-29
	Exercise: Converting Catia or STL files	20-37

Chapter 21:	Smart Components	21-1
	Using Auto Size & Configurator Table	21-1
	Tools needed	21-2
	Opening a part document	21-3
	Showing the dimensions and their names	21-3
	Splitting the FeatureManager tree	21-4
	Adding a new configuration	21-4
	Creating mate references	21-6
	Testing the mate references	21-7
	Making a smart component	21-8
	Testing the smart component	21-9
	Adding other instances of the cap	21-10

Chapter 22:	Using Subtract & Intersect Tools Simple Cavity	22-1 22-1
	Opening a part document	22-3
	Scaling the part	22-3
	Extruding the mold block	22-3
	Assigning material	22-4
	Copying a solid body	22-4
	Creating the cavity	22-5
	Separating the solid bodies	22-6
	Using the intersect tool	22-7
	Exercise: Creating a Cavity with Combine Subtract	22-10

Chapter 23:

Using Magnetic Mates	23-1
Deck Assembly	23-1
Tools needed	23-2
Publishing an asset	23-4
Opening another part document	23-6
Defining another asset publisher	23-7
Opening an assembly document	23-8
Adding the section1 component to the assembly	23-9
Adding another instance of section1	23-10
Adding more instances	23-11

Chapter 24:	Hybrid Modeling	24-1
	Remote Control	24-1
	Tools needed	24-2

Extruding the first surface	24-3
Extruding the second surface	24-4
Trimming the surfaces	24-4
Thickening the surfaces	24-5
Creating a split line feature	24-5
Adding draft	24-6
Adding a variable size fillet	24-7
Shelling the solid body	24-8
Cutting the solid body	24-8
Saving the upper half	24-9
Saving the lower half	24-9
Flipping the cut direction	24-9
Inserting the top half	24-10
Creating the cut for the keypad	24-11
Separating the two halves	24-12
Changing appearance	24-12
Exercise: Loft with guide curves	24-15
Exercise: Using boundary solid	24-17
Exercise: Using boundary surface	24-19
	Extruding the second surface Trimming the surfaces Thickening the surfaces Creating a split line feature Adding draft Adding a variable size fillet Shelling the solid body Cutting the solid body Cutting the solid body Saving the upper half Saving the lower half Flipping the cut direction Inserting the top half Creating the tup halves Changing appearance Exercise: Loft with guide curves Exercise: Using boundary solid
