TABLE OF CONTENTS

Chapter 1: Introduction to Surfaces 1-1
- Solids vs. surfaces 1-1
- Patching with continuity 1-2
  - Contact, tangent, and curvature continuous 1-2
- When to use surfaces 1-3
- When not to use surfaces 1-3
- The spline handles 1-4
- Check your surface model frequently 1-5
- The best approach 1-6

Chapter 2: Surfacing Basics 2-1
- Opening a part document 2-1
- Extruding a surface 2-1
- Creating a curve through reference points 2-2
- Creating the planar surfaces 2-3
- Knitting the surfaces 2-4
- Saving your work 2-4

- Revolved surface 2-5
- Creating a section view 2-6
- Adding fillets 2-6

- Swept surface 2-8
- Sketching the sweep path 2-8
- Creating a swept surface 2-9

- Lofted surface 2-10
- Sketching the 3rd profile 2-10
- Creating a lofted surface 2-11

- Boundary surface 2-13
- Sketching the 3D splines 2-13
- Creating a boundary surface 2-16

- Exercise: Extrude and Trim Surfaces 2-18

Chapter 3: Using Boundary and Lofted Surface 3-1
- Starting a new part document 3-1
- Creating the 1st reference plane 3-3
- Sketching the 1st boundary profile 3-3

Sketching the 2nd boundary profile 3-4
Comparing methods 3-5
Creating a boundary surface 3-6
Creating the 2nd reference plane 3-7
Constructing the 1st trim sketch 3-8
Trimming the bottom 3-9
Constructing a split sketch 3-10
Creating a split line feature 3-11
Deleting faces 3-12
Thickening the surface model 3-13
Adding fillets 3-14
RealView graphics 3-15
Ambient occlusion 3-16

Using Surface Trim & Loft Lofted Surface 3-17
Creating a revolved surface 3-17
Trimming with a sketch 3-18
Making a surface offset 3-18
Trimming with another sketch 3-19
Creating a lofted surface 3-20
Knitting all surfaces 3-21

Exercise: Creating a Lofted Surface 3-23

Chapter 4: Multibody Designs 4-1
Opening a part document 4-1
Creating a revolved surface 4-1
Creating a trimmed sketch 4-2
Adding Thickness 4-4
Creating a split line feature 4-4
Making an offset surface 4-5
Creating a raised label area 4-5
Creating a 2nd raised feature 4-6
Adding a new plane 4-6
Creating a boss feature 4-7
Adding fillets 4-8
Adding a pin hole 4-9
Mirroring features 4-10
Creating the handle sketch 4-10
Extruding the handle 4-11
Adding fillets 4-11
Adding a hole 4-12
Adding a fillet 4-13
Creating a pin 4-13

Mirroring the pin 4-14
Creating an exploded view 4-15

Exercise: Coffee Mug – Multibody Design 4-17

Chapter 5: Surface Creation 5-1
Creating the 1st sketch 5-1
Creating the 2nd sketch 5-2
Trimming the surfaces 5-3
Mirroring a surface body 5-4
Making the loft profiles 5-5
Creating a lofted surface 5-6
Making the fill profiles 5-7
Creating two filled surfaces 5-8
Creating a planar surface 5-9
Knitting the surfaces 5-9
Creating fillets 5-10
Creating a split line feature 5-11
Creating a face fillet using hold-line 5-12
Creating more fillets 5-13

Boundary & Lofted Surface Exercise – Phone Case 5-14
Opening a part document 5-14
Creating a boundary surface 5-14
Creating the 1st lofted surface 5-15
Creating the 2nd lofted surface 5-16
Creating the 3rd lofted surface 5-17
Hiding the sketches 5-18
Knitting the surface 5-19

Exercise: Trim & Mirror Surfaces 5-20

Chapter 6: Using Filled, Knit & Boundary Surface 6-1
Opening a part document 6-1
Creating a boundary surface 6-2
Creating a revolved surface 6-3
Creating a filled surface 6-4
Knitting the surfaces 6-5
Creating a split line feature 6-6
Changing the face color 6-7
Shelling the model 6-8
Enabling RealView Graphics 6-8

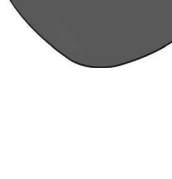
Using Deform Surface 6-9

Opening a part document 6-9
Creating a lofted surface 6-9
Creating a deform feature 6-10
Trimming to the final size 6-11
Patching the bottom surface 6-12
Knitting the surfaces 6-12
Adding fillets 6-13

Exercise: Boundary Surface 6-15
Mid-Term Quiz: Toy Design 6-19

Chapter 7: Using Trim, Thicken & Configurations 7-1

Opening a part document 7-1
Trimming the surfaces 7-1
Mirroring a surface body 7-2
Creating a lofted surface 7-3
Patching up the two ends 7-4
Creating the LED holes 7-5
Making the power cord opening 7-6
Knitting the surfaces 7-7
Adding fillets 7-7
Adding thickness 7-8
Creating a recess cut 7-9
Making a cut 7-10
Creating the cover plate 7-10



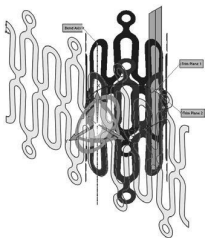
Using Configurations 7-15
Opening a part document 7-15
Adding a new configuration 7-15
Modifying dimensions 7-16
Adding another configuration 7-17

Exercise: Trim, Knit & Patch Surfaces 7-21

Chapter 8: Curved Driven Pattern & Flex Bending 8-1

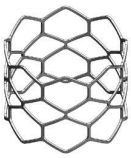
Opening a part document 8-1
Creating a 3D sweep path 8-1
Creating a swept surface 8-2
Creating a curve driven pattern 8-3

Stent Designs – Exercise 1 8-5
Creating a planar surface 8-5
Creating a rolled pattern 8-6
Thickening the surface model 8-7



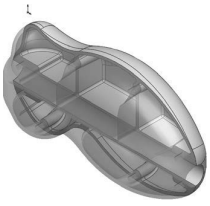
Stent Designs – Exercise 2 8-8
Starting a part document 8-8
Creating a split sketch 8-9
Creating a split line feature 8-10
Deleting faces 8-10
Adding thickness 8-11
Creating an axis 8-12
Creating a circular pattern 8-13
Combining the solid bodies 8-14

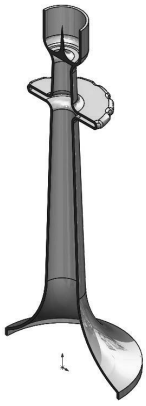
Stent Designs – Exercise 3 8-15
Opening a part document 8-15
Creating the base sketch 8-15
Creating a planar surface 8-16
Trimming with a sketch 8-16
Thickening the surface 8-17
Creating a flex bending feature 8-18



Exercise: Pattern & Flex Bending 8-19
Exercise: Using Surfaces 8-23

Chapter 9: Surfaces & Solids– Hybrid Modeling 9-1
Opening a part document 9-1
Creating the extruded surfaces 9-1
Trimming the surfaces 9-4
Adding fillets 9-5
Thickening the surface model 9-7
Adding the inner support feature 9-8
Creating an extruded cut 9-9
Adding the support ribs 9-10
Adding the mounting bosses 9-11
Adding fillets 9-12
Saving the housing right-half 9-13
Mirroring part 9-13
Creating an extruded cut feature 9-15
Saving the left half 9-16
Adding the alignment pins 9-17
Adding chamfers 9-18
Saving the right half 9-18
Inserting a part document 9-19
Creating an exploded view 9-20





Exercise: Hybrid Modeling 9-21
Exercise: Using the Wrap Tool 9-26

Exercise: Using Offset from Surface 9-28

Chapter 10: Mold Tools, Intersect & Core/Cavity 10-1
Starting a new part document 10-1
Creating a revolved surface 10-2
Making the sketch of the sweep path 10-2
Creating a new plane 10-3
Creating a rib feature 10-4
Circular patterning the rib 10-4
Trimming the overlaps 10-5
Adding thickness 10-6
Adding fillets 10-7
Adding material 10-8
Scaling the model 10-8
Creating the parting lines 10-9
Creating the shut-off surfaces 10-10
Creating the parting surfaces 10-11
Creating a tooling split 10-12
Creating an exploded view 10-13
Renaming and hiding the references 10-14

Using Intersect 10-15
Opening a part document 10-15
Inserting another part document 10-15
Moving the solid bodies 10-16
Using the intersect option 10-17

Exercise: Core and Cavity Creation 10-19

Chapter 11: Surface Repairs and Patches 11-1
Opening a part document 11-1
Creating the lofted surfaces 11-2
Patching the raised feature 11-3
Patching the corner of the keyway 11-5
Using the filled surface command 11-6
Using the lofted surface command 11-7
Using the boundary surface command 11-8
Creating the additional curves 11-9
Creating a loft with guide curves 11-10
Removing features 11-11
Deleting holes 11-12
Removing features 11-12
Knitting the surfaces 11-14
Assigning material 11-15

Calculating the mass 11-15

Exercise: Surface Repair & Patches 11-17

Lesson 12: Rendering with Visualize 12-1

Opening a Parasolid document 12-1
Enabling Visualize 12-1
Exporting to Visualize 12-2
Changing the Environment (the Scene) 12-3
Assigning the Appearances 12-4
Adjusting the brightness 12-5
Creating the Rendering 12-6

Exercise 2: Rendering with Visualize 12-11

Final Exam: Hybrid Modeling 12-18

Lesson 13: CSWPA-SU Exam Preparation 13-1

Certified SolidWorks Professional Advanced Surfaces Exam preparation material
Challenge 1: Modifying surface geometry 13-3
Challenge 2: Loft & boundary surfaces 13-11
Challenge 3: Tapered surfaces 13-23
Challenge 4: Working with imported parts 13-27
Challenge 5: Surface model design 13-32
Challenge 6: Working with curves 13-43
