

SOLIDWORKS® 2026

Intermediate Skills

Expanding on Solids, Surfaces, Multibodies,
Configurations, Drawings, Sheet Metal
and Assemblies

Paul Tran CSWE, CSWI

TABLE OF CONTENTS

Introduction:	SOLIDWORKS 2026 User Interface	20
	The 3 reference planes	21
	The toolbars	21
	The system feedback symbols	23
	The status bar	23
	2D sketch examples	24
	3D feature examples	25

Chapter 1:	Document Properties	1-1
	Setting up the Document Template	1-1
	Different standards in the world	1-2
	Starting a new part document	1-3
	Setting the ANSI drafting standards	1-3
	Setting the dimension options	1-4
	Setting the virtual sharp options	1-5
	Setting the units options	1-5
	Setting the image quality options	1-6
	Saving the settings as a Part Template	1-6
	Customizing Keyboard Shortcuts	1-7
	Customizing Tool Buttons	1-12

Chapter 2:	Sketching Skills	2-1
	Handle	2-1
	Tools Needed	2-2
	Starting a new part document	2-3
	Changing the System Options	2-3
	Creating the Parent Sketch	2-4
	Revolving the parent sketch	2-7
	Adding the tip detail	2-7
	Revolving the sketch	2-8
	Transitioning from line-to-arc	2-8
	Mirroring in sketch mode	2-9
	Adding dimensions	2-10
	Extruding a cut	2-10

Creating a circular pattern	2-11
Adding other cut features	2-12
Creating another circular pattern	2-13
Adding a constant size fillet	2-14
Assigning material to the model	2-15
Calculating the mass of the model	2-16
Saving your work	2-16
Working with Sketch Pictures	2-17
Using Contour Select Tool	2-37

Chapter 3:

Creating Multibody Parts	3-1
Wooden Crate	3-1
Tools needed	3-2
Starting a new part document	3-3
Sketching the first body profile	3-4
Extruding the first body	3-6
Copying the body	3-6
Creating the upper plank	3-7
Creating the first linear pattern	3-9
Mirroring the planks	3-10
Creating the lower plank	3-10
Creating the second linear pattern	3-12
Creating an exploded view	3-13
Collapsing the view	3-15
Saving your work	3-16
Exercise: Combining Multibody Parts	3-17

Chapter 4:

Working with Multibody Parts	4-1
Creating Mates & Exploded Views	4-1
Tools needed	4-2
Opening a part document	4-3
Creating an exploded view	4-4
Collapsing the solid bodies	4-6
Inserting another part	4-7
Constraining the solid bodies	4-8
Adding a concentric mate	4-8
Adding a coincident mate	4-9
Creating a new mirror plane	4-10
Creating a mirror body	4-11
Inserting another part	4-13
Adding a concentric mate	4-14

Adding a coincident mate	4-14
Adding another instance of the bolt	4-15
Adding a concentric mate	4-15
Adding a coincident mate	4-16
Editing the exploded view	4-16
Saving your work	4-17
Working with Multibodies	4-19

Chapter 5:**Revolved and Thread Features**

Cylinder	5-1
Tools needed	5-1
Opening a part document	5-2
Creating a revolved feature	5-3
Adding chamfers	5-3
Creating the mounting holes	5-4
Adding threads	5-4
Adding threads to the opposite end	5-7
Creating a zonal section view	5-9
Saving your work	5-11
Exercise: Revolved & Threads	5-12
	5-13

Chapter 6:**Flex Bending**

Spanner	6-1
Tools needed	6-2
Flex Bending - Part 1	6-2
Opening a part document	6-3
Creating the first flex bending feature	6-3
Creating the second flex bending feature	6-5
Flex examples	6-6
Flex twisting	6-6
Flex stretching	6-6
Flex tapering	6-7
Flex bending	6-7
Flex Bending - Part 2	6-8
Opening a part document	6-8
Creating a flex bending	6-8
Creating a linear pattern	6-10
Exercise: Flex Bending a Car Tire	6-11
Using the Deform feature	6-13
Opening a part document	6-13
Creating a Curve-to-Curve deform	6-13

Save and close	6-14
Opening a part document	6-15
Creating a Curve to Curve deform	6-15
Mirroring a surface body	6-16
Save and close all documents	6-16
Exercise: Deform using a 3D sketch	6-17
Exercise: Using Sweep with profile twist	6-19
Exercise: Using sweep with deform	6-23

Chapter 7:

Sweep with Guide Curves	7-1
Plastic Bottle	7-1
Tools needed	7-2
Opening a part document	7-3
Creating the main body	7-3
Creating the first split line	7-5
Creating a face fillet	7-6
Creating the second split line	7-7
Creating the first offset surface	7-8
Creating a ruled surface	7-8
Creating the first knit surface	7-9
Adding the first fillet	7-9
Making the first cut with surface	7-10
Creating the first offset surface	7-11
Creating the second offset surface	7-11
Creating the second knit surface	7-12
Adding the second fillet	7-12
Making the second cut with surface	7-13
Adding the third fillet	7-14
Creating a shell	7-14
Adding the neck feature	7-15
Revolving the sketch	7-16
Creating a new plane	7-16
Creating a helix	7-17
Sketching the thread profile	7-18
Making the threads	7-19
Rounding off the ends of threads	7-19
Revolving the sketch	7-20
Rounding off the opposite side	7-20
Sweep with Solid Body	7-21
Exercise: Sweep Cut using a Solid Body	7-28
Exercise: Sweep Using a Sketch Profile	7-34

Chapter 8:

Lofts and Boundaries	8-1
Solar Boat	8-1
Tools needed	8-2
Opening a part document	8-3
Creating a lofted feature	8-3
Creating a boundary feature	8-5
Creating the wing	8-6
Creating the wing support	8-7
Constructing the nose feature	8-8
Creating the horizontal tail fins	8-11
Creating the vertical tail fin	8-12
Creating a split line	8-13
Creating the canopy's first profile	8-14
Creating a new plane	8-15
Sketching the guide curve	8-15
Creating the canopy's second loft profile	8-16
Creating the canopy's third loft profile	8-16
Creating the canopy feature	8-17
Creating a mirror feature	8-17
Adding fillets to the main body	8-18
Adding fillets to the float and wing	8-18
Adding fillets to the ends of the floats	8-19
Adding fillets to the tail fins	8-19
Adding fillets to the ends of the fins	8-20
Creating a face fillet	8-20
Creating a split line for the solar panels	8-21
Changing color of the solar squares	8-22
Changing the edge display	8-23
Exercise: Surface & Solid Modeling	8-25
Exercise: Using Split Lines	8-33

**Chapter 9:**

Surfaces and Patches	9-1
Welding Fixture	9-1
Tools needed	9-2
Opening a part document	9-3
Creating a swept surface	9-3
Creating the first extruded surface	9-4
Creating the second extruded surface	9-4
Creating the third extruded surface	9-5
Creating the first trimmed surface	9-5
Creating the second trimmed surface	9-6
Creating the third trimmed surface	9-7

Creating a lofted surface	9-9
Creating the first boundary surface	9-10
Creating the second boundary surface	9-11
Creating the first filled surface	9-12
Creating the second filled surface	9-13
Creating a face fillet	9-14
Knitting the surfaces	9-15
Thickening the surface model	9-16
Creating a section view	9-17
Changing the edge display	9-18
Exercise: Surface Modifications	9-19

Chapter 10:

Configure Features	10-1
Wooden Crate	10-1
Tools needed	10-2
Opening a part document	10-3
Configuring features	10-3
Saving the table	10-5
Adding a new configuration	10-5
Viewing the new configuration	10-6
Adding more configurations	10-7
Renaming a configuration	10-9
Inserting a design table	10-10
Exercise: Design Tables & Tabulated Tables	10-12

Chapter 11:

Assembly Motions & Mates	11-1
HeliDrone	11-1
Tools needed	11-2
Opening an existing assembly document	11-3
Using the width mate	11-3
Adding a concentric mate	11-4
Adding another concentric mate	11-6
Testing the assembly motions	11-6
Adding a limit-angle mate	11-7
Adding a parallel mate	11-8
Adding a gear mate	11-9
Testing the assembly motions	11-10
Radial Explode	11-11
Opening an existing assembly	11-11
Creating the first pattern driven	11-11
Creating the second pattern driven	11-12

Chapter 12:

Creating the first radial exploded view	11-13
Creating the second radial exploded view	11-13
Verifying the exploded view	11-14
Exercise: Assembly Motions	11-15

Using Smart-Mates

12-1

Fixture Assembly	12-1
Tools Needed	12-2
Opening an existing assembly document	12-3
Enabling the selection options	12-3
Exploring the Smart-Mate options	12-4
Using Smart-Mate Concentric	12-5
Creating a Smart-Mate Concentric & Coincident	12-6
Repeating the previous mate	12-7
Mating other components	12-8
Checking the status of the components	12-9
Switching configuration	12-9
Creating an instance of the bolt	12-10
Creating another instance of the bolt	12-11
Adding more bolts	12-12
Repeating	12-13
Using Mate Controller	12-15
Using copy with mates	12-25

Chapter 13:

Introduction to Top Down Assembly

13-1

Car Remote Control Housing	13-1
Tools Needed	13-2
Opening a part document	13-3
Making an assembly from part	13-3
Placing the first component	13-4
Creating a new part	13-4
Converting the entities	13-5
Extruding the sketch	13-6
Adding the fillet	13-6
Shelling the part	13-7
Hiding a component	13-7
Adding features to the part	13-8
Creating offset entities	13-9
Extruding the sketch	13-10
Adding the fillet	13-10
Showing a component	13-11
Creating a section view	13-11

Applying dimension changes	13-12
Creating an exploded view	13-14
Playing the animation	13-15
Changing the display mode	13-16
Creating a Flat Spring Assembly	13-17
Exercise: Spring Assembly	13-29

Chapter 14:

Using the Lip & Groove Options	14-1
Lesson overview	14-1
Tools Needed	14-2
Using the Lip & Groove Options	14-3
Opening a part document	14-4
Editing the housing	14-4
Creating a section view	14-7
Using the Mounting Boss Tool	14-8
Opening an assembly document	14-9
Creating a mounting boss-hole feature	14-9
Setting the parameters	14-9
Hiding the Upper Half body	14-11
Creating a mounting boss-pin feature	14-12
Creating a section view	14-14
Repeating	14-14

Chapter 15:

Assembly Drawings & BOM	15-1
Aluminum Enclosure	15-1
Tools needed	15-2
Starting a new drawing document	15-3
Selecting the ANSI standard sheet size	15-3
Switching to ANSI standards	15-4
Using the view palette	15-5
Inserting a Bill of Materials	15-6
Modifying the BOM's Row Height	15-8
Adding a new column	15-8
Customizing the new column	15-9
Changing the color of the paper	15-10
Adding balloons	15-11
Adding an isometric view	15-12
Changing the display of a drawing view	15-13
Editing the sheet format	15-13
Switching back to the sheet	15-16
Reference reading: GD&T	15-18
Form examples	15-18

Orientation examples	15-19
Profile examples	15-19
Runout examples	15-20
Location examples	15-20
ASME – Y14.5 Symbol descriptions	15-22
Feature control frames	15-25
MMC maximum material condition	15-26
LMC least material condition	15-26

Chapter 16: Drawings & Detailing

Front Cover Plate	16-1
Tools needed	16-2
Opening a part document	16-3
Creating the drawing views	16-4
Changing to phantom line style	16-6
Creating a partial section view	16-7
Flipping the section direction	16-8
Changing the hatch pattern	16-8
Creating a detail view	16-9
Inserting the model dimensions	16-10
Cleaning up the dimensions	16-11
Inserting dimensions to another view	16-12
Breaking the view alignment	16-13
Creating a projected view	16-14
Adding the centerline symbols	16-15
Adding datums	16-16
Adding a flatness tolerance	16-18
Adding a perpendicular tolerance	16-19
Copying the control frame	16-20
Modifying the geometric tolerance	16-21
Adding another position tolerance	16-22
Adding a symmetric tolerance	16-23
Adding a bilateral tolerance	16-23
Adding a limit tolerance	16-24
Adding a basic tolerance	16-24
Adding general notes	16-25
Filling out the title block	16-26
Exercise: Creating a drawing from a model	16-29
Exercise: Attaching a note or symbol to a dimension	16-30
Exercise: Creating an engineering drawing	16-53

Chapter 17: SOLIDWORKS MBD	17-1
Introduction to Model Based Definition	17-1
Tools needed	17-2
Prismatic Parts	17-3
Opening a part document	17-3
Enabling SOLIDWORKS MBD	17-3
Setting the options	17-3
Adding datums	17-5
Using scope	17-6
Showing the constraint status	17-7
Adding the size dimensions	17-8
Showing the tolerance status	17-8
Exercise: Adding the Size and Location Dimensions	17-9
Turned Parts	17-13
Capturing 3D Views	17-19
Publishing PDF and eDrawing Files	17-23
3D PDF Template Editor	17-30

Chapter 18: Sheet Metal Parts	18-1
Hard Drive Enclosure	18-1
Tools needed	18-2
Starting a new part document	18-3
Creating the Base flange	18-4
Creating a cut feature	18-5
Creating the first edge flange	18-6
Creating the second edge flange	18-9
Copying and pasting a sketch	18-11
Adding more cuts	18-13
Adding a library feature cut	18-15
Mirroring a feature	18-17
Toggling the flat display	18-18
Creating the flat pattern	18-19
Accessing the sheet properties	18-20
Sheet metal parts – Multibody Design	18-21
Using FeatureWorks – Feature Recognition	18-37

Chapter 19: Plastic Parts	19-1
Plastic Part_Design1	19-1
Tools Needed	19-2
Making the base feature	19-3

Creating a cut feature	19-4
Adding the raised features	19-5
Adding fillets	19-6
Shelling the model	19-6
Adding the interlock feature	19-7
Creating a face fillet	19-8
Adding another fillet	19-9
Creating the side holes	19-10

Plastic Part_Design2	19-11
Extruding the base feature	19-11
Making the upper cut	19-12
Creating a new plane	19-14
Sketching the button holes	19-14
Making the cut	19-15
Shelling the model	19-16
Adding a step cut	19-17
Making the interlock feature	19-18
Extruding a boss feature	19-19
Adding a fillet	19-20
Creating the flat-cable outlet cut	19-20
Creating the LED holes	19-21
Adding the mounting bosses	19-22
Adding the mounting holes	19-23
Adding a fillet	19-24

Chapter 20:

Casted Parts	20-1
Casted Upper Housing	20-1
Tools needed	20-2
Creating the base	20-3
Inserting the counterbore hole	20-5
Making the side support walls	20-8
Adding drafts	20-9
Mirroring multiple features	20-10
Creating a rib feature	20-11

Casted Valve Body	20-15
Viewing the part/child relationships	20-16
Exercise: Casted Bracket	20-29
Exercise: Converting Catia or STL files	20-37

Chapter 21:	Smart Components	21-1
	Using Auto Size & Configurator Table	21-1
	Tools needed	21-2
	Opening a part document	21-3
	Showing the dimensions and their names	21-3
	Splitting the FeatureManager tree	21-4
	Adding a new configuration	21-4
	Creating mate references	21-6
	Testing the mate references	21-7
	Making a smart component	21-8
	Testing the smart component	21-9
	Adding other instances of the cap	21-10
Chapter 22:	Using Subtract & Intersect Tools	22-1
	Simple Cavity	22-1
	Opening a part document	22-3
	Scaling the part	22-3
	Extruding the mold block	22-3
	Assigning material	22-4
	Copying a solid body	22-4
	Creating the cavity	22-5
	Separating the solid bodies	22-6
	Using the intersect tool	22-7
	Exercise: Creating a Cavity with Combine Subtract	22-10
Chapter 23:	Using Magnetic Mates	23-1
	Deck Assembly	23-1
	Tools needed	23-2
	Publishing an asset	23-4
	Opening another part document	23-6
	Defining another asset publisher	23-7
	Opening an assembly document	23-8
	Adding the section1 component to the assembly	23-9
	Adding another instance of section1	23-10
	Adding more instances	23-11
Chapter 24:	Hybrid Modeling	24-1
	Remote Control	24-1
	Tools needed	24-2

Chapter 21:

Smart Components	21-1
Using Auto Size & Configurator Table	21-1
Tools needed	21-2
Opening a part document	21-3
Showing the dimensions and their names	21-3
Splitting the FeatureManager tree	21-4
Adding a new configuration	21-4
Creating mate references	21-6
Testing the mate references	21-7
Making a smart component	21-8
Testing the smart component	21-9
Adding other instances of the cap	21-10

Chapter 22:

Using Subtract & Intersect Tools	22-1
Simple Cavity	22-1
Opening a part document	22-3
Scaling the part	22-3
Extruding the mold block	22-3
Assigning material	22-4
Copying a solid body	22-4
Creating the cavity	22-5
Separating the solid bodies	22-6
Using the intersect tool	22-7
Exercise: Creating a Cavity with Combine Subtract	22-10

Chapter 23:

Using Magnetic Mates	23-1
Deck Assembly	23-1
Tools needed	23-2
Publishing an asset	23-4
Opening another part document	23-6
Defining another asset publisher	23-7
Opening an assembly document	23-8
Adding the section1 component to the assembly	23-9
Adding another instance of section1	23-10
Adding more instances	23-11

Chapter 24:

Hybrid Modeling	24-1
Remote Control	24-1
Tools needed	24-2

Extruding the first surface	24-3
Extruding the second surface	24-4
Trimming the surfaces	24-4
Thickening the surfaces	24-5
Creating a split line feature	24-5
Adding draft	24-6
Adding a variable size fillet	24-7
Shelling the solid body	24-8
Cutting the solid body	24-8
Saving the upper half	24-9
Saving the lower half	24-9
Flipping the cut direction	24-9
Inserting the top half	24-10
Creating the cut for the keypad	24-11
Separating the two halves	24-12
Changing appearance	24-12
Exercise: Loft with guide curves	24-15
Exercise: Using boundary solid	24-17
Exercise: Using boundary surface	24-19
