## TABLE OF CONTENTS

### TABLE OF CONTENTS

|                                                                              |    |
|------------------------------------------------------------------------------|----|
| CHAPTER 1. INTRODUCTION.....                                                 | 15 |
| A. SOLIDWORKS® Flow Simulation.....                                          | 15 |
| B. Project.....                                                              | 16 |
| C. Meshing.....                                                              | 16 |
| D. Calculation Control Options.....                                          | 18 |
| E. Boundary Conditions.....                                                  | 18 |
| F. Goals.....                                                                | 19 |
| G. Results.....                                                              | 21 |
| H. References.....                                                           | 21 |
| CHAPTER 2. FLAT PLATE BOUNDARY LAYER.....                                    | 23 |
| A. Objectives.....                                                           | 23 |
| B. Problem Description.....                                                  | 23 |
| C. Creating the SOLIDWORKS Part.....                                         | 24 |
| D. Setting Up the Flow Simulation Project.....                               | 29 |
| E. Selecting Boundary Conditions.....                                        | 32 |
| F. Inserting Global Goals and Calculation Controls.....                      | 35 |
| G. Running the Calculations.....                                             | 38 |
| H. Using Cut Plots to Visualize the Flow Field.....                          | 40 |
| I. Using XY Plots with Templates.....                                        | 41 |
| J. Comparison of Flow Simulation Results with Theory and Empirical Data..... | 43 |
| K. Cloning of the Project.....                                               | 46 |
| L. References.....                                                           | 56 |
| M. Exercises.....                                                            | 56 |
| CHAPTER 3. FLOW PAST A SPHERE AND A CYLINDER.....                            | 59 |
| A. Objectives.....                                                           | 59 |
| B. Problem Description.....                                                  | 59 |
| C. Creating the SOLIDWORKS Part for the Sphere.....                          | 60 |
| D. Setting Up the Flow Simulation Project for the Sphere.....                | 66 |
| E. Inserting Global Goal for Calculations.....                               | 68 |
| F. Running the Calculations.....                                             | 70 |
| G. Using Cut Plots.....                                                      | 71 |
| H. Inserting Surface Parameters.....                                         | 72 |
| I. Theory.....                                                               | 73 |
| J. Cloning the Project.....                                                  | 73 |

## TABLE OF CONTENTS

|                                                                             |            |
|-----------------------------------------------------------------------------|------------|
| K. Time-Dependent Calculations.....                                         | 74         |
| L. Creating SOLIDWORKS Part for Cylinder.....                               | 76         |
| M. Setting Up Flow Simulation Project for Cylinder.....                     | 77         |
| N. Inserting Global Goals for Calculations and Selecting 2D Flow.....       | 78         |
| O. Tabular Saving.....                                                      | 79         |
| P. Running Calculations for Cylinder.....                                   | 80         |
| Q. Using Excel for Frequency Analysis.....                                  | 81         |
| R. Inserting XY Plots.....                                                  | 82         |
| S. Strouhal number.....                                                     | 84         |
| T. Inserting Cut Plots.....                                                 | 84         |
| U. References.....                                                          | 86         |
| V. Exercises.....                                                           | 86         |
| <b>CHAPTER 4. FLOW PAST AN AIRFOIL.....</b>                                 | <b>89</b>  |
| A. Objectives.....                                                          | 89         |
| B. Problem Description.....                                                 | 89         |
| C. Creating the SOLIDWORKS Part.....                                        | 90         |
| D. Setting Up Flow Simulation Project.....                                  | 94         |
| E. Inserting Global Goals.....                                              | 97         |
| F. Inserting Equation Goals.....                                            | 97         |
| G. Global and Local Mesh.....                                               | 98         |
| H. Running Simulations.....                                                 | 99         |
| I. Using Cut Plots.....                                                     | 102        |
| J. Theory.....                                                              | 103        |
| K. Creating a Custom Visualization Parameter.....                           | 104        |
| L. Cloning of Project.....                                                  | 108        |
| M. Creating a Batch Run.....                                                | 110        |
| N. Reference.....                                                           | 115        |
| O. Exercises.....                                                           | 115        |
| <b>CHAPTER 5. RAYLEIGH-BENARD CONVECTION &amp; TAYLOR-COUETTE FLOW.....</b> | <b>117</b> |
| A. Objectives.....                                                          | 117        |
| B. Problem Description.....                                                 | 117        |
| C. Creating the SOLIDWORKS Part for Rayleigh-Benard Convection.....         | 118        |
| D. Setting Up Flow Simulation Project for Rayleigh-Benard Convection.....   | 120        |
| E. Creating Lids.....                                                       | 122        |
| F. Boundary Conditions for Rayleigh-Benard Convection.....                  | 123        |
| G. Setting Up 2D Flow.....                                                  | 125        |

## TABLE OF CONTENTS

|                                                                   |     |
|-------------------------------------------------------------------|-----|
| H. Global Goal for Rayleigh-Benard Convection .....               | 126 |
| I. Running Calculations.....                                      | 126 |
| J. Inserting Cut-Plots .....                                      | 128 |
| K. Comparison with Neutral Stability Theory.....                  | 129 |
| L. Creating SOLIDWORKS Part for Taylor-Couette Flow.....          | 131 |
| M. Flow Simulation Project for Taylor-Couette Flow .....          | 133 |
| N. Boundary Conditions for Taylor-Couette Flow.....               | 134 |
| O. Global Goal and Simulations for Taylor-Couette Flow .....      | 137 |
| P. Inserting Surface Plots.....                                   | 138 |
| Q. Comparison with Neutral-Stability Theory.....                  | 140 |
| R. References.....                                                | 142 |
| S. Exercises.....                                                 | 142 |
| CHAPTER 6. PIPE FLOW.....                                         | 143 |
| A. Objectives .....                                               | 143 |
| B. Problem Description.....                                       | 143 |
| C. Creating the SOLIDWORKS Part.....                              | 144 |
| D. Flow Simulation Project.....                                   | 147 |
| E. Lids for the Pipe.....                                         | 149 |
| F. Computational Domain and Mesh .....                            | 150 |
| G. Boundary Conditions.....                                       | 152 |
| H. Global Goal and Calculation Control Options .....              | 154 |
| I. Flow Simulations for Laminar Pipe Flow.....                    | 156 |
| J. Inserting Cut Plots.....                                       | 156 |
| K. Inserting XY Plots for Laminar Pipe Flow Using Templates ..... | 157 |
| L. Theory for Laminar Pipe flow.....                              | 160 |
| M. Flow Simulations for Turbulent Pipe Flow.....                  | 161 |
| N. Theory for Turbulent Pipe Flow .....                           | 162 |
| O. XY Plots for Turbulent Pipe Flow Using Templates.....          | 163 |
| P. References.....                                                | 166 |
| Q. Exercises.....                                                 | 166 |
| CHAPTER 7. FLOW ACROSS A TUBE BANK.....                           | 167 |
| A. Objectives .....                                               | 167 |
| B. Problem Description.....                                       | 167 |
| C. Creating a SOLIDWORKS Part.....                                | 168 |
| D. Flow Simulation Project.....                                   | 169 |
| E. Computational Domain and Mesh.....                             | 171 |

|                                                             |            |
|-------------------------------------------------------------|------------|
| F. Boundary Conditions .....                                | 172        |
| G. Global Goals.....                                        | 173        |
| H. Flow Simulations for Tube Bank Flow .....                | 173        |
| I. Inserting Cut Plots.....                                 | 174        |
| J. Sketches for XY Plots.....                               | 175        |
| K. Theory and Empirical Data.....                           | 178        |
| L. References .....                                         | 180        |
| M. Exercises .....                                          | 181        |
| <b>CHAPTER 8. HEAT EXCHANGER.....</b>                       | <b>183</b> |
| A. Objectives .....                                         | 183        |
| B. Problem Description.....                                 | 183        |
| C. Creating the SOLIDWORKS Part.....                        | 184        |
| D. Flow Simulation Project.....                             | 192        |
| E. Creating Lids .....                                      | 194        |
| F. Boundary Conditions .....                                | 195        |
| G. Inserting Goals.....                                     | 197        |
| H. Simulations for Heat Exchanger.....                      | 198        |
| I. Surface Parameters.....                                  | 199        |
| J. Cut-Plots.....                                           | 200        |
| K. Theory for Effectiveness-NTU Method.....                 | 201        |
| L. References .....                                         | 203        |
| M. Exercises .....                                          | 204        |
| <b>CHAPTER 9. BALL VALVE .....</b>                          | <b>205</b> |
| A. Objectives .....                                         | 205        |
| B. Problem Description.....                                 | 205        |
| C. Creating the Ball Valve.....                             | 206        |
| D. Ball Valve Housing and Pipe Sections.....                | 212        |
| E. Ball Valve and Pipe Assembly.....                        | 216        |
| F. Flow Simulation Project for Ball Valve.....              | 219        |
| G. Creating Lids, Maximum Gap Size and Number of Cells..... | 220        |
| H. Boundary Conditions.....                                 | 221        |
| I. Goals.....                                               | 222        |

| C. Flow Simulation Project.....                     | 362 |
| D. Computational Domain.....                        | 364 |
| E. Goals.....                                       | 365 |
| F. Rotating Region.....                             | 366 |
| G. Global Mesh.....                                 | 366 |
| H. Local Mesh.....                                  | 367 |
| I. Calculation Control Options.....                 | 368 |
| J. Running Simulations.....                         | 368 |
| K. Cloning of Project and Creating a Batch Run..... | 371 |
| L. Theory.....                                      | 373 |
| M. References.....                                  | 378 |
| N. Exercise.....                                    | 378 |
| CHAPTER 19. SUPERSONIC FLOW OVER A CONE.....        | 379 |
| A. Objectives.....                                  | 379 |
| B. Problem Description.....                         | 379 |
| C. Modeling SOLIDWORKS Part.....                    | 379 |
| D. Flow Simulation Project.....                     | 380 |
| E. Computational Domain.....                        | 382 |
| F. Global Mesh.....                                 | 383 |
| G. Goals.....                                       | 383 |
| H. Running Simulations.....                         | 384 |

## TABLE OF CONTENTS

|                                                                     |     |
|---------------------------------------------------------------------|-----|
| I. Cut Plots.....                                                   | 385 |
| J. Cut Plots.....                                                   | 386 |
| K. Plotting Density.....                                            | 387 |
| L. Theory.....                                                      | 388 |
| M. References.....                                                  | 389 |
| N. Exercises.....                                                   | 390 |
| CHAPTER 20. ROTATING PLANE CHANNEL FLOW.....                        | 391 |
| A. Objectives.....                                                  | 391 |
| B. Problem Description.....                                         | 391 |
| C. Creating SOLIDWORKS Part for Rotating Plane Channel Flow.....    | 391 |
| D. Flow Simulation Project for Rotating Plane Channel Flow.....     | 393 |
| E. Boundary Conditions for Rotating Plane Channel Flow.....         | 397 |
| F. Global Goal and Simulations for Rotating Plane Channel Flow..... | 399 |
| G. Inserting Surface Plots.....                                     | 400 |
| H. Theory.....                                                      | 403 |
| I. References.....                                                  | 404 |
| J. Exercises.....                                                   | 404 |
| CHAPTER 21. CURVED CHANNEL FLOW.....                                | 405 |
| A. Objectives.....                                                  | 405 |
| B. Problem Description.....                                         | 405 |
| C. Creating SOLIDWORKS Part for Curved Channel Flow.....            | 405 |
| D. Flow Simulation Project for Curved Channel Flow.....             | 407 |
| E. Boundary Conditions for Curved Channel Flow.....                 | 411 |
| F. Global Goal and Simulations for Curved Channel Flow.....         | 413 |
| G. Inserting Surface Plots.....                                     | 414 |
| H. Theory.....                                                      | 416 |
| I. References.....                                                  | 419 |
| J. Exercises.....                                                   | 419 |
| INDEX.....                                                          | 421 |
