

Includes
Three New Chapters

Thermal Analysis

with SOLIDWORKS® Simulation 2026
and Flow Simulation 2026

Paul M. Kurowski

Better Textbooks. Lower Prices.

Table of Contents

<i>About the Author</i>	<i>i</i>
<i>Table of Contents</i>	<i>iii</i>
<i>Before You Start</i>	<i>1</i>
<i>1: Introduction</i>	<i>5</i>
• Heat transfer by conduction	
• Heat transfer by convection	
• Heat transfer by radiation	
• Thermal boundary conditions	
• Numerical tools used in analysis of heat transfer	
• Analogies between thermal and structural analysis	
• Thermal elements: solids and shells	
• Scalar and vector entities	
• Presenting results	
• Steady state thermal analysis	
• Transient thermal analysis	
• Linear thermal analysis	
• Nonlinear thermal analysis	
<i>Part 1</i>	<i>21</i>
<i>2: Hollow plate</i>	<i>23</i>
• Heat transfer by conduction	
• Heat transfer by convection	
• Different ways of presenting results of thermal analysis	
• Convergence analysis in thermal problems	
• Solid elements in heat transfer problems	
• Shell elements in heat transfer problems	
<i>3: L bracket</i>	<i>37</i>
• Heat transfer by conduction	
• Use of 2D simplification	
• Singularities in thermal problems	

4: Round bar	45
<ul style="list-style-type: none">• Heat transfer by conduction• Thermal conductivity• Heat transfer by convection• Convective boundary conditions• Thermal resistance• Prescribed temperature boundary conditions• Heat power• Heat flux	
5: Heating ducts	63
<ul style="list-style-type: none">• Heat transfer by conduction• Heat transfer by convection• Temperature boundary conditions• Convective boundary conditions• Heat power• Heat flux• Heat flux singularities	
6: Hot plate	89
<ul style="list-style-type: none">• Transient thermal analysis• Conductive heat transfer• Convective heat transfer• Heat power• Thermostat• Thermal inertia	
7: Coffee mug	99
<ul style="list-style-type: none">• Transient thermal analysis• Thermal stress analysis• Thermal symmetry boundary conditions• Structural symmetry boundary conditions• Use of soft springs	
8: Link	113
<ul style="list-style-type: none">• Buckling caused by thermal expansion• Interpretation of Buckling Load Factor	

9: Heat sink	123
<ul style="list-style-type: none">• Analysis of an assembly• Thermal contact conditions• Steady state thermal analysis• Transient thermal analysis• Thermal resistance layer• Thermal symmetry boundary conditions	
10: Furnace	139
<ul style="list-style-type: none">• Steady state heat transfer• Transient heat transfer• Initial temperature• Heat power• Convective boundary conditions• Symmetry boundary conditions	
Part 2	149
11: Radiation of a black body	151
<ul style="list-style-type: none">• Heat transfer by radiation• Emissivity• Black body• Radiating heat out to space• Transient thermal analysis• Heat power• Heat energy	
12: Radiation of a hemisphere	163
<ul style="list-style-type: none">• Heat transfer by radiation• Emissivity• Radiating heat out to space• View factors• Heat power	

13: Radiation between bodies	171
<ul style="list-style-type: none">• Heat transfer by radiation• Heat transfer by convection• Emissivity• Radiating heat out to space• Heat power• Open system• Closed system• Steady state heat transfer• Transient heat transfer• Initial temperature	
Part 3	181
14: Internal fluid flow	183
<ul style="list-style-type: none">• Introduction to Flow Simulation• Using Flow Simulation for finding convective boundary conditions• Interfacing between Flow Simulation and Thermal analysis• Interfacing between Flow Simulation and Structural analysis	
15: External fluid flow	227
<ul style="list-style-type: none">• External fluid flow• Using Flow Simulation for finding convection coefficients in external fluid flow• Interfacing between Flow Simulation and Thermal analysis in Simulation• Types of result plots in Flow Simulation• Computational Domain	
16: Microchip cooling	245
<ul style="list-style-type: none">• Conjugate Heat Transfer with External Flow• Thermal Resistance• Ideal wall• Component control	
17: Radiative heat transfer	259
<ul style="list-style-type: none">• Conjugate heat transfer• Radiative heat transfer• Emissivity• Flow Simulation material library• Simulation material library• Thermal stresses	

18: Pellets	279
<ul style="list-style-type: none">• External flow• Forced convection• Heat transfer by convection• Heat transfer by radiation	
19: Loop	293
<ul style="list-style-type: none">• Heat transfer by convection• Heat transfer by radiation• Size of Computational Domain	
Part 4	307
20: NAFEMS Benchmarks	309
<ul style="list-style-type: none">• Importance of benchmarks• One dimensional heat transfer with radiation• One dimensional transient heat transfer• Two dimensional heat transfer with convection	
21: Glossary of terms	325
22: References	329
23: List of exercises	331
