CONTENTS

1 Getting Started

1

Introduction.....	1
Objectives.....	1
Getting Started with Autodesk Inventor.....	2
User Interface.....	2
Application Menu.....	3
Quick Access Toolbar.....	3
Tabs.....	3
Panels.....	3
Commands.....	3
Information Toolbar.....	3
ViewCube.....	3
Navigation Bar.....	4
Documents Menu.....	4
Capacity Meter.....	4
Status Bar.....	4
Document Tabs.....	4
Browser.....	4
Graphics Window/Canvas.....	4
File Tab.....	5
Recent Documents.....	5
Open Documents.....	5
Display.....	5
Order to List Files.....	5
Pin to Menu.....	5
Preview Image.....	5
Ribbon.....	6
Quick Access Toolbar.....	7
Open Files.....	7
Opening Multiple Documents.....	8
Document Tabs.....	8
New Files.....	9
File Information.....	10
File Types.....	10
Part (.ipt).....	10
Assembly (.iam).....	10
Presentation (.ipn).....	10
Sheet Metal (.ipt).....	11
Drawing (.dwg and .idw).....	11
Project (.ipj).....	11
iFeature (.ide).....	11

Save File Options.....	11
Save.....	11
Save All.....	12
Save As.....	12
Save Copy As.....	12
Save Copy As Template.....	12
Pack and Go.....	12
Save Reminder.....	12
Application Options.....	12
General.....	13
Save.....	13
File.....	13
Colors.....	13
Display.....	14
Hardware.....	14
Prompts.....	14
Drawing.....	14
Notebook.....	14
Sketch.....	14
Part.....	14
iFeature.....	14
Assembly.....	14
Content Center.....	14
Exercise 1-1: User Interface.....	14
Command Entry.....	17
Tooltips.....	17
Marking Menus and Context (Overflow) Menus.....	18
Autodesk Inventor Shortcut Keys.....	18
Repeat Last Command.....	18
Undo and Redo.....	19
Help System.....	19
Projects in Autodesk Inventor.....	19
Project Setup.....	20
Project File Search Options.....	20
Creating Projects.....	20
What Type of Project Are You Creating?.....	22
New Single-User Project.....	22
New Vault Project.....	22
Creating a New Single-User Project.....	22
Autodesk Vault.....	24
Exercise 1-2: Projects.....	24
Changing your Viewpoint.....	27
Home (Isometric) View.....	27

Navigation Bar 27
 ViewCube 29
 Dynamically Rotate Viewpoint Shortcuts 30
 Exercise 1-3: Viewing a Model 30

2 Sketching, Constraining, and Dimensioning 35

Introduction 35
 Objectives 35
 Part and Sketch Application Options 36
 Part Options 36
 Sketch Options 37
 Units 38
 Templates 39
 Creating a Part File 40
 Creating a Part File from a Specified Template 41
 Sketches and Origin (Default) Planes 41
 Origin 3D Indicator 42
 New Sketch 42
 Sketching the 2D Outline of the Part 44
 Sketching Overview 44
 Sketch Commands 44
 Using the Sketch Commands 44
 Dimension Input 45
 Line Command 45
 Object Tracking – Inferred Points 46
 Automatic Constraints 47
 Scrubbing 47
 Deleting Objects 47
 Common Sketch Commands 48
 Selecting Objects 49
 Exercise 2-1: Creating a Sketch with Lines 50
 Exercise 2-2: Creating a Sketch with Tangencies 52
 Constraining A Sketch 53
 Constrain to the Origin Point 53
 Constraint Types 54
 Adding Constraints 55
 Showing Constraints 55
 Modifying Constraint Size 55
 Deleting Constraints 56
 Hiding Constraints 56
 Construction Geometry 57
 Number of Required Constraints or Dimensions 58

Degrees of Freedom 58
 Dragging a Sketch 58
 Exercise 2-3: Adding and Displaying Constraints 59

Adding Dimensions Manually 63
 Scale Sketch 63
 General Dimensioning 63
 Dimensioning Lines 64
 Dimensioning Angles 64
 Dimensioning Arcs and Circles 64
 Dimensioning to a Tangent of an Arc or Circle 64
 Entering and Editing a Dimension Value 65
 Fractions 66
 Repositioning a Dimension 66
 Fully Constrained Sketch 66
 Over Constrained Sketch 67
 Relax Mode 67
 Driven Dimension 68

Exercise 2-4: Constraining and Dimensioning a Sketch 69

Measure Command 72
 Region Properties 75
 Inserting an AutoCAD File 76
 Inserting 2D AutoCAD Data into a Sketch 76
 Insert AutoCAD File with Associativity 78
 Open Other File Types 78
 Exercise 2-5: Inserting AutoCAD Data 79
 Applying Your Skills 83
 Skills Exercise 2-1 83
 Skills Exercise 2-2 83

3 Creating & Editing Sketched Features 85

Introduction 85
 Objectives 85
 Features 86
 Consumed and Unconsumed Sketches 86
 Understanding the Browser 87
 Switching Environments 88
 3D Modeling Commands 88
 Direct Manipulation 88
 Mini-Toolbars 89
 Property(ies) Panels 90
 Extrude a Sketch 90

Input Geometry	91	Chamfers	131
Use this section to select the area to extrude and define where the extrude feature starts.	91	Methods	132
Extents	92	Edge Chain	133
Advanced Properties	94	Setback	133
Exercise 3-1: Extruding a Sketch	94	Preserve All Features	134
Linear Diameter Dimensions	96	Create Partial Chamfer	134
Centerline	96	Exercise 4-1: Creating Fillets and Chamfers	135
Normal Line	97	Holes	138
Revolve a Sketch	97	Creating Hole Features	138
Input Geometry	98	Holes Dialog Box	139
Exercise 3-2: Revolving a Sketch	100	Advanced Settings	141
Primitive Shapes/Features	102	Editing Hole Features	141
Secondary 2D Sketched Features	104	Exercise 4-2: Creating Holes	142
Create a new 2D Sketch	104	Slot	146
Select Other-Face Cycling	105	Creating a Slot	146
Slice Graphics	105	Slot Type	147
Exercise 3-3: Sketch Features	106	Exercise 4-3: Creating A Slot	148
Editing a Feature and Sketch	108	Shelling	149
Edit Feature Command	108	Shell Type	150
Editing a Feature's Sketch	109	Direction	151
Renaming Features and Sketches	109	Remove Faces	151
Deleting a Feature	109	Automatic Face Chain	151
Failed Features	110	Solids	151
Exercise 3-4: Editing Features and Sketches	110	Thickness	151
Projecting Geometry	112	Thickness Override Sets	151
Projecting Edges	112	Advanced Properties	151
Exercise 3-5: Projecting Geometry	114	Exercise 4-4: Shelling a Part	151
Part Material, Properties and Appearance	116	Work Features	153
Part Material	116	Creating a Work Axis	153
Appearance	117	Exercise 4-5: Creating Work Axes	154
Additional Appearance Commands	117	Creating Work Points	156
Applying Your Skills	120	Creating Work Planes	159
Skills Exercise 3-1	120	UCS—User Coordinate System	161
Skills Exercise 3-2	121	Feature Visibility	163
Skills Exercise 3-3	122	Editing the UCS	163
4 Creating Placed Features	125	Exercise 4-6: Creating Work Planes and a UCS	164
Introduction	125	Exercise 4-7: Creating Holes Through Cylinders	168
Objectives	125	Patterns	171
Fillets	126	Rectangular Patterns	171
Edge Fillet	127	Exercise 4-8: Creating a Rectangular Pattern	173
Face Fillet	129	Circular Patterns	175
Full Round Fillet	130	Exercise 4-9: Creating Circular Pattern	177

Linear Patterns—Pattern along a Path.....	179
Exercise 4-10: Creating a Pattern Along a Nonlinear Path	180
3D Printing – Additive Manufacturing	182
Applying Your Skills	184
Skills Exercise 4-1	184
Skills Exercise 4-2	185

5 Creating & Editing Drawing Views 187

Introduction.....	187
Objectives.....	187
Drawing Options	188
Creating a Drawing.....	189
Drawing Sheet Preparation	190
Border.....	191
Title Block.....	192
Edit Property Fields Dialog Box.....	193
Save Drawing to a Template.....	193
Creating Drawing Views	194
Creating a Base View	194
Creating Projected Views	196
Moving Drawing Views	197
Drawing Zone Identifiers.....	197
Exercise 5-1: Creating a Multiview Drawing	198
Creating Auxiliary Views	201
Creating Section Views	202
Creating a Detail View	206
Exercise 5-2: Creating Auxiliary, Section, and Detail Views.....	208
Creating Break Views	210
Exercise 5-3: Creating Break View.....	212
Editing Drawing Views.....	213
Editing Drawing View Properties	213
Deleting Drawing Views.....	214
Break and Align Views.....	214
Replace Model Reference	215
Exercise 5-4: Editing Drawing Views.....	216
Annotations.....	218
Drawing Standards and Styles	218
Centerlines and Center Marks.....	221
Automated Centerlines for Drawing Views	223
Exercise 5-5: Adding Centerlines	224
Adding Dimensions to a Drawing View.....	227

Retrieving Model Dimensions.....	227
Selecting Dimensions – Additional Options	229
Auto Arrange Dimensions.....	230
Moving and Centering Dimension Text.....	230
Editing a Model Dimension's Value in a Drawing	230
Creating General Dimensions	231
Exercise 5-6: Adding Dimensions.....	233
Creating Baseline Dimensions	237
Creating Chain Dimensions.....	240
Exercise 5-7: Creating Baseline & Chain Dimensions	242
Creating Ordinate Dimensions	244
Adding Text and Additional Symbols	246
Text and Leader Text	246
Annotation Symbols.....	247
Hole and Thread Notes.....	248
Exercise 5-8: Adding Annotations	250
Creating a Hole Table	253
Exercise 5-9: Creating Hole Tables	255
Shortcut for Opening Referenced Files	258
Opening a Model File from a Drawing.....	258
Opening a Drawing from a Model File.....	258
Create a 3D PDF	259
3D Annotations / Model-Based Definition (MBD) 261	
Creating a 3D Annotation	261
Tolerance Advisor	262
Controlling Visibility of Annotations.....	262
Retrieving 3D Annotations in a Drawing.....	263
Applying Your Skills	264
Skills Exercise 5-1	264
Skills Exercise 5-2	265

6 Creating & Documenting Assemblies 267

Introduction.....	267
Objectives.....	267
Assembly Options.....	268
Creating Assemblies.....	268
Placing Components	270
Placing Components from Another CAD System	272
Creating a Component in an Assembly	274
The Assembly Browser	275
Occurrences	275
The Assembly Capacity Meter.....	276

Editing a Component in Place	276	Interference Checking	316
Opening a Component in an Assembly	277	Exercise 6-5: Analyzing an Assembly	317
Grounded Component	278	Driving a Constraint	319
Degrees of Freedom (DOF)	278	Exercise 6-6: Driving a Constraint	320
Adding Assembly Constraints	279	Creating a Presentation File	323
Assembly Constraint Command	279	Creating Presentation Views and Snapshots	324
Constraint Limits	281	Tweak Components	326
Assembly Constraint Examples	281	Capture Camera Viewpoint	328
Motion Constraints	284	Play the Animation	329
Transitional Constraint	285	Create a New Storyboard	329
Constraint Set Constraint	286	Publish a Video from a Storyboard	329
Selecting Geometry and the Select Other Command	286	Snapshot View	330
Applying an Assembly Constraint	287	Create a Drawing from a Snapshot View	331
ALT + Drag Constraining Technique	287	Publish a Raster Image from a Snapshot View	332
Moving and Rotating Components	287	Exercise 6-7: Creating a Presentation Storyboard	333
Free Move	287	Creating Drawing Views from Assemblies & Pre-	sentations
Free Rotate	288	Bill of Material (BOM)	338
Editing Assembly Constraints	289	Sorting Items in the BOM	339
Identify under-constrained components	290	Renumbering Items in the BOM	340
Exercise 6-1: Assembling Parts	292	Adding Columns to the BOM	340
Assembly Joints	297	Changing the View Options of the BOM	340
Creating an Assembly Joint	298	Opening a Part from the BOM Editor	341
Tips for using the joint command	300	Exercise 6-8: Editing a Bill of Material (BOM) ...	341
Exercise 6-2: Assembly Joints	300	Creating Balloons	344
Additional Assembly Commands	302	Placing Individual Balloons	344
Browser Views	302	Auto Ballooning	346
Other Half	303	Moving and Aligning Balloons	347
Constraint Tooltip	304	Editing a Balloon's Value	348
User-Defined Assembly Folders	304	Parts List	349
Isolating Assembly Components	3054	Editing a Parts List	349
Visibility Control	305	Editing Parts List BOM Data	350
Adaptivity	305	Creating Custom Parts	351
Project Geometry in the Context of an Assembly	306	Wrapping a Parts List	351
Creating an Adaptive Sketch/Part Manually	306	Exercise 6-9: Creating a Drawing from an Assem-	bly
Exercise 6-3: Designing a Part in Context of an	Assembly	Applying Your Skills	360
Patterning Components	310	Skills Exercise 6-1	361
Associative Pattern	310	Skills Exercise 6-2	363
Rectangular Pattern	311		
Circular Pattern	312		
Exercise 6-4: Patterning Components	313		
Analysis Commands	315		
Measure Distance	315		
Identifying the Center of Gravity of an Assembly	315		
		7 Advanced Modeling Techniques	367
		Introduction	367
		Objectives	367

Sheet Metal Defaults, Rules and Styles	483
Sheet Metal Defaults	483
Sheet Metal Rules and Styles	484
Sheet Metal Unfold Rule.....	489
Exercise 8-1: Editing a Sheet Metal Style and Rule	
489	
Face.....	492
Unfold Options and Bend Tabs.....	493
Contour Flange.....	493
Width Extents	494
From Sketch Plane.....	495
Edge Sets	495
Bend Properties and Corner Defaults.....	496
Flange.....	496
Exercise 8-2: Creating Sheet Metal Parts	498
Hem.....	502
Shape Tab.....	503
Unfold Options and Bend Tabs.....	503
Bend	503
Shape Tab.....	505
Unfold Options and Bend Tabs.....	506
Edit a Bend.....	506
Cut.....	506
Fold.....	508
Shape Tab.....	509
Unfold Options and Bend Tabs.....	509
Corner Round	509
Corner Chamfer.....	510
Exercise 8-3: Creating Bend, Cut, Hem and Fold	
Features	510
Flat Pattern	517
Define A-Side.....	517
Create Flat Pattern	517
Flat Pattern Environment.....	518
Flat Pattern Definition and Extents	518
Export a Flat Pattern.....	519
Detailing Sheet Metal Parts	519
Exercise 8-4: Flattening & Documenting Sheet	
Metal Parts	520
Applying Your Skills	524
Skill Exercise 8-1.....	524
